Ghost Image Hervé Guibert 2014-03-26 Ghost Image is made up of sixty-three short essays—meditations, memories, fantasies, and stories bordering on prose poems—and not a single image. Hervé Guibert's brief, literary rumination on photography was written in response to Roland Barthes's *Camera Lucida*, but its deeply personal contents go far beyond that canonical text. Some essays talk of Guibert's parents and friends, some describe old family photographs and films, and spinning through them all are reflections on remembrance, narcissism, seduction, deception, death, and the phantom images that have been missed. Both a memoir and an exploration of the artistic process, Ghost Image not only reveals Guibert's particular experience as a gay artist captivated by the transience and physicality of his media and his life, but also his thoughts on the more technical aspects of his vocation. In one essay, Guibert searches through a cardboard box of family portraits for clues—answers, or even questions—about the lives of his parents and more distant relatives. Riffling through vacation snapshots and the autographed images of long-forgotten film stars, Guibert muses, "I don't even recognize the faces, except occasionally that of an aunt or great-aunt, or the thin, fair face of my mother as a young girl." In other essays, he explains how he composes his photographs, and how—in writing—he seeks to escape and correct the inherent limits of his technique, to preserve those images lost to his technical failings as a photographer. With strains of Jean Genet and recurring themes that speak to the work of contemporary artists across a range of media, Guibert's *Ghost Image* is a beautifully written, melancholic ode to existence and art forms both fleeting and powerful—a unique memoir at the nexus of family, memory, desire, and photography.

The Diary of a Young Girl Anne Frank 1996-02-01 THE DEFINITIVE EDITION • Discovered in the attic in which she spent the last years of her life, Anne Frank's remarkable diary has since become a world classic—a powerful reminder of the horrors of war and an eloquent testament to the human spirit.

Updated for the 75th Anniversary of the Diary's first publication with a new introduction by Nobel Prize-winner Nadia Murad "The single most compelling personal account of the Holocaust ... remains astonishing and excruciating."—The New York Times Book Review In 1942, with Nazis occupying Holland, a thirteen-year-old Jewish girl and her family fled their home in Amsterdam and went into hiding. For the next two years, until their whereabouts were betrayed to the Gestapo, they and another family lived cloistered in the "Secret Annex" of an old office building. Cut off from the outside world, they faced hunger, boredom, the constant cruelties of living in confined quarters, and the ever-present threat of discovery and death. In her diary Anne Frank recorded vivid impressions of her experiences during this period. By turns thoughtful, moving, and amusing, her account offers a fascinating commentary on human courage and frailty and a compelling self-portrait of a sensitive and spirited young woman whose promise was tragically cut short.

Quantum Manjit Kumar 2008-10-02 'This is about gob-smacking science at the far end of reason ... Take it nice and easy and savour the experience of your mind being blown without recourse to hallucinogens' Nicholas Lezard, Guardian For most people, quantum theory is a byword for mysterious, impenetrable science. And yet for many years it was equally baffling for scientists themselves. In this magisterial book, Manjit Kumar gives a dramatic and superbly-written history of this fundamental scientific revolution, and the divisive debate at its core. Quantum theory looks at the very building blocks of our world, the particles and processes without which it could not exist. Yet for 60 years most physicists believed that quantum theory denied the very existence of reality itself. In this tour de force of science history, Manjit Kumar shows how the golden age of physics ignited the greatest intellectual debate of the twentieth century. Quantum theory is weird. In 1905, Albert Einstein suggested that light was a particle, not a wave, defying a century of experiments. Werner Heisenberg's uncertainty principle and Erwin Schrodinger's famous dead-and-alive cat are similarly strange. As Niels Bohr said, if you weren't shocked by quantum theory, you didn't

really understand it. While "Quantum" sets the science in the context of the great upheavals of the modern age, Kumar's centrepiece is the conflict between Einstein and Bohr over the nature of reality and the soul of science. 'Bohr brainwashed a whole generation of physicists into believing that the problem had been solved', lamented the Nobel Prize-winning physicist Murray Gell-Mann. But in "Quantum", Kumar brings Einstein back to the centre of the quantum debate. "Quantum" is the essential read for anyone fascinated by this complex and thrilling story and by the band of brilliant men at its heart.

Yukiko's Spinach Frederic Boilet 2003 Narrator or character? Reality or fiction? In this tender work of cinema, Boilet recounts an intimate love story in today's T?ky? between an everyday Japanese girl, Yukiko, and her occidental lover. Passionate, gentle, fresh and vibrant, it is a love so strong it hurts. Quietly paced, the story unfolds in a host of innovative techniques both narrative and visual. At the heart of the title is Boilet's deliberate (mis)use of the pronounced Japanese for [i]nnavel[i] and [i]spinach[i]. First serialized in 2000 - 2001 in the monthly Furansugo Kaiwa it is the defining work of Boilet's [i]Nouvelle Manga[i] movement.

The History and Power of Writing Henri-Jean Martin 1994 Continuing on to the electronic revolution, Martin's account takes in the changes wrought on writing by computers and electronic systems of storage and communication, and offers surprising insights into the influence these new technologies have had on children born into the computer age. The power of writing to influence and dominate is, indeed, a central theme in this history, as Martin explores the processes by which the written word has gradually imposed its logic on society over four thousand years. The summation of decades of study by one of the world's great scholars on the subject, this fascinating account of writing explains much about the world we inhabit, where we uneasily confer, accept, and resist the power of the written word.

Right of Inspection Jacques Derrida 1998 "You will never know, nor will you, all the stories I kept telling myself as I looked at these images." With these words Jacques Derrida opens his reading of Marie-Francoise Plissart's hundred-page photo-novel. Originally published in France in 1985, this tour de force of word and image is available in English for the first time. Plissart's visual narrative unfolds in photographs, and photographs of photographs, in a kind of silent cinematography. Derrida's polylogue explores gender, photographic genre, time, language, and the interpretative act of seeing. The text and the photographs, each with its own structure and syntax, together illuminate what is at stake in the "right of inspection."

The Optical Unconscious Rosalind E. Krauss 1994-07-25 The Optical Unconscious is a pointed protest against the official story of modernism and against the critical tradition that attempted to define modern art according to certain sacred commandments and self-fulfilling truths. The account of modernism presented here challenges the vaunted principle of "vision itself." And it is a very different story than we have ever read, not only because its insurgent plot and characters rise from below the calm surface of the known and law-like field of modernist painting, but because the voice is unlike anything we have heard before. Just as the artists of the optical unconscious assaulted the idea of autonomy and visual mastery, Rosalind Krauss abandons the historian's voice of objective detachment and forges a new style of writing in this book: art history that insinuates diary and art theory, and that has the gait and tone of fiction. The Optical Unconscious will be deeply vexing to modernism's standard-bearers, and to readers who have accepted the foundational principles on which their aesthetic is based. Krauss also gives us the story that Alfred Barr, Meyer Shapiro, and Clement Greenberg repressed, the story of a small, disparate group of artists who defied modernism's most cherished self-descriptions, giving rise to an unruly, disruptive force that persistently haunted the field of modernism from the 1920s to the 1950s and continues to disrupt it today. In order to understand why modernism had to repress the optical unconscious, Krauss eavesdrops on Roger Fry in the salons of Bloomsbury, and spies on the toddler John Ruskin as he amuses himself with the patterns of a rug; we find her in the living room of Clement Greenberg as he complains about "smart Jewish girls with their typewriters" in the 1960s, and in colloquy with Michael Fried about Frank Stella's love of baseball. Along the way, there are also narrative encounters with Freud, Jacques Lacan, Georges Bataille, Roger Caillois, Gilles Deleuze, and Jean-François Lyotard. To embody this optical unconscious, Krauss turns to the pages of Max Ernst's collage novels, to Marcel Duchamp's hypnotic Rotoreliefs, to Eva Hesse's luminous sculptures, and to Cy Twombly's, Andy Warhol's, and Robert Morris's scandalous decoding of Jackson Pollock's drip pictures as "Anti-Form." These artists introduced a new set of values into the field of twentieth-century art, offering ready-made images of obsessive fantasy in place of modernism's intentionality and unexamined compulsions.

Claude Simon moments photographiques Irene Albers 2007-05-31 Presque tous les romans de Claude Simon évoquent la photographie : qu'il s'agisse d'un personnage photographe dans Le Vent (1957), de clichés jaunis (L'Herbe, 1958), d'instantanés immobiles (Le Palace, 1962), de cartes postales ou d'une photographie énigmatique d'Histoire (1967), sans oublier les archives photographiques maternelles de L'Acacia... Mais chez Simon cette présence des images nourrit d'abord une réflexion sur la langue, participe à son invention formelle. Sa pratique de la « description dynamique » s'élabore dans un lien étroit à la visualité traumatique, désintégratrice de la photographie, suscitant une véritable esthétique du choc. En dialogue avec les principales théories de la photographie (Kracauer, Benjamin et Barthes) comme avec l'intertexte littéraire de Simon (Proust, notamment), Moments photographiques fait apparaître la photographie comme une figure conceptuelle majeure des nouvelles poétiques de la mémoire. Et livre, ce faisant, à travers sa lecture de l'oeuvre simonienne, une contribution décisive à toute Histoire littéraire de la photographie.

286 jours Frédéric Boilet 2013 De Pétrarque à André Breton, l'amour fou n'a jamais cessé de redéfinir l'imaginaire du couple. '286 jours' s'inscrit dans cette grande lignée, tout en la renouvelant de façon brûlante et radicale. Car ici la rencontre entre l'homme et la femme prend la forme d'une œuvre à quatre mains où les désirs, les voix et les regards s'échangent et se confondent, pour finalement se heurter et se disjoindre. C'est le journal croisé d'une passion amoureuse et sexuelle, aussi brève qu'intense, photographiée en même temps qu'elle se vit. '286 jours' explore un nouveau langage pour faire ressentir tous les moments et toutes les nuances de l'intimité d'une relation. Cru, sensuel, bouleversant, '286 jours' déborde tous les genres, comme si le regard croisé des amants brouillait jusqu'aux limites de soi et du monde.
