Marketing Channels and Supply Chain Networks in North America Robert D. Tamilia 2020-04-09 This book provides a rare historical analysis on the development and importance of marketing channels to Supply Chain Management (SCM) in Northern America. In particular, the book looks at the period 1850 to the present, to understand the evolution, the trends and the current status. It aims to bring back this forgotten area of research, to the mainstream marketing thought process. A general overview of developments in marketing channels will help the reader understand what changes occurred and how some of these changes impacted marketing education and practice. First, the book provides an overview of the historical background of how manufacturing and distribution evolved in the 19th century. Next, the marketing channels and supply chain networks are defined. Then the three time periods within 1850- present are covered. The book explains how supply chain has become prominent in organizations, the movement to non-store retailing and the omnichannel is discussed to focus on recent developments in distribution. Finally, developments that relate to the academic discipline and implications for the future are examined. The book concludes by describing the relationship between marketing channels and supply chain today, based on historical analysis.

Congressional Record United States. Congress 1959 The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)
