Twelve Years a Slave Solomon Northup 2021-01-01
"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an

You're on the ground with National Guardsman Paul M. Kendel while patrolling the "Triangle of Death"--Baghdad 2005. A compelling, quick-reading, gritty military narrative is a voyage of spiritual discovery. There are few, if any, stories like it in modern Buddhist literature. At the same time, it's a classic war memoir, replete with details of battle and the modern soldier's life, told in a voice by turns humane, humorous, sarcastic and thoughtful. Original.

Worldwide Evil and Misery Robin Ruitter 2015-09-03

BANNED IN FRANCE This book is about the

development of a New World Order that aims to suppress the whole of humanity. We are raised, by tradition, to trust our governments, and convinced that they care about us.

This, however, is a big mistake. Below the surface of official politics lies a complicated social and intellectual process that is taking place. The world is governed by

very different personages from what is imagined by those who are not behind the scenes. We are governed, our minds are molded, our tastes formed, our ideas-suggested, largely by men, that we have never heard of. In almost every act of our daily lives, whether in the sphere of politics or business, in our social conductor or our ethical thinking, we are dominated by the relatively small number of persons. Are the visible world leaders just mere puppets directed by an invisible power from behind the scenes? Are there invisible hands controlling the world? Is there a conspiracy? Who are the conspirators? We are dealing with the rise of a new geopolitical supranational power on the world scene. This geopolitical power consists of the richest families on this planet. Together with the most powerful multinationals they rule and control all countries and all coalitions. The true aim of this elite group is complete control of Planet Earth. They consist of a small elite group formed by the most influential and powerful, anonymous, very exclusive family dynasties that live dispersed over the world. They keep their power and money betwixt them by intermarriage. They operate behind the scenes of the most important enterprises, media and the financial institutions, but also behind the political scenes. Through connections, money and violence these powerful double-crossing families slipped in with one ultimate goal: the establishment of a One World dictatorship. Their target is to force a New World Order on the whole of mankind. They have bought an enormous part of the world with its economic power and placed it under its control. With the help of their unimaginable financial reserves they

currently dispose of a worldwide financial control system with which they can control the entire world economy and political system. They determine how the leading politicians of this world have to act. Over time these influential families have extended the scope of their power over the whole world. Their web reaches all corners of the world. Their tentacles are woven with all facets of human existence. Their influence is unimaginable and it reaches all the leading institutions and organizations in the fields of politics, education, religion, finances and mass media. Science has also been infiltrated by them and is financially dependent on them and thus subject to manipulation (think of the Rockefeller, Carnegie, and Guggenheim foundation). The New World Order they are planning will be a World Dictatorship. Conservatives will call it Socialism or Communism. Liberals will call it Fascism. The label makes little difference; it will be the Gulag Archipelago on a worldwide basis. This book is a very unique publication and reading it will undoubtedly change the way you look at both history and the world today. It completely turns everything on its head. Once you read it, all of a sudden you will see the world around you in infrared. You soon see things which are simply not possible to view with the range of standard vision. The contents of this book is highly controversial and uncompromising. It describes a monster that we, in all our ignorance, have created together. It also serves to give us an idea of what's in store for the near future, so we can better prepare for what's coming our way. In 2006 the first French edition of this book was banned in France.

The Death of Luigi Trastulli and Other Stories Alessandro

Portelli 2010-03-30 Portelli offers a new and challenging approach to oral history, with an interdisciplinary and multicultural perspective. Examining cultural conflict and communication between social groups and classes in industrial societies, he identifies the way individuals strive to create memories in order to make sense of their lives, and evaluates the impact of the fieldwork experience on the consciousness of the researcher. By recovering the value of the story-telling experience, Portelli's work makes delightful reading for the specialist and non-specialist alike. Alessandro Portelli is Professor of American Literature at the University of Rome "La Sapienza."

Realist Cinema as World Cinema Lúcia Nagib 2020-10-19

This book presents the bold and original proposal to replace the general appellation of 'world cinema' with the more substantive concept of 'realist cinema'. Veering away from the usual focus on modes of reception and spectatorship, it locates instead cinematic realism in the way films are made. The volume is structured across three innovative categories of realist modes of production: 'non-cinema', or a cinema that aspires to be life itself; 'intermedial passages', or films that incorporate other artforms as a channel to historical and political reality; and 'total cinema', or films moved by a totalising impulse, be it towards the total artwork, total history or universalising landscapes. Though mostly devoted to recent

productions, each part starts with the analysis of foundational classics, which have paved the way for future realist endeavours, proving that realism is timeless and inherent in cinema from its origin.

Images of Colonialism and Decolonisation in the Italian Media Paolo Bertella Farnetti 2017-11-06 The twentieth century saw a proliferation of media discourses on colonialism and, later, decolonisation. Newspapers, periodicals, films, radio and TV broadcasts contributed to the construction of the image of the African "Other" across the colonial world. In recent years, a growing body of literature has explored the role of these media in many colonial societies. As regards the Italian context, however, although several works have been published about the links between colonial culture and national identity, none have addressed the specific role of the media and their impact on collective memory (or lack thereof). This book

fills that gap, providing a review of images and themes that have surfaced and resurfaced over time. The volume is divided into two sections, each organised around an underlying theme: while the first deals with visual memory and images from the cinema, radio, television and new media, the second addresses the role of the printed press, graphic novels and comics, photography and trading cards.

The Value of Worthless Lives Ilaria Serra 2007 There are many good books on Italian immigration to the United States, including success biographies, field researches and historical investigations. What is lacking however is an account of the immigrant experience from a "grassroots" point of view. This book tells the stories of a normal people, the great majority of the immigrant population, through their own, sometimes almost illiterate, words. With this book I aim to contribute to this country's story of immigration with these first-hand accounts of those who lived it, first-generation immigrants. It was said once, by Giuseppe Prezzolini, that Italian immigration left tears and sweat but not "words." The material of this book proves such arrogance wrong. I tried to be as thorough as possible in my field research looking for such "words" on

both sides of the Ocean. I consulted Italian and American archives, I looked for books out of print, and scavenged for unpublished ones in private houses and forgotten drawers. What I found fills a silence and gives a wider spectrum of the immigrant experience, from the miner to the tailor, from the janitor to the professor. The book will interest scholars of Italian immigration because it adds information from within the protagonists' self. Their tales may be average, their memory may be inaccurate but their drive toward a new life and their immigrant "philosophy," made of grinding teeth and hope, is all there in its most fresh features. The book will also interest scholars of the autobiographical genre because it adds a new facet to the autobiographical voice. There are only a few studies on the life writing of the lower class (which come from France and England, not the US). I have tried to formulate new concepts that describe the autobiographical "I" of these works, conc

The Devotion and Promotion of Stigmatics in Europe, C. 1800-1950 Tine Van Osselaer 2021 "In the nineteenth century a new type of mystic emerged in Catholic Europe. While cases of stigmatisation had been reported since the thirteenth century, this era witnessed the development of the 'stigmatic': young women who attracted widespread interest thanks to the appearance of physical stigmata. To understand the popularity of these stigmatics we need to regard them as the 'saints' and religious 'celebrities' of their time. With their 'miraculous' bodies, they fit contemporary popular ideas (if not necessarily those of the Church) of what sanctity was. As knowledge about them spread via modern media and their fame became

marketable, they developed into religious 'celebrities'"--

Architectural Flirtations Brady Burroughs 2016 In a move toward a more vulnerable, ethical and empowering culture of architecture, the project aims to displace the culture of critique, by questioning and undermining relationships of power and privilege through practices that are explicitly critical, queer feminist, and Campy. In other words, it takes seriously, in an uncertain, improper and playful way, what is usually deemed unserious within the architectural discipline, in order to undermine the usual order of things. All of the (love) storeys take place on March 21st, the spring equinox, in and around a 1977 collaborative row house project called Case Unifamiliari in Mozzo, Italy, designed by Aldo Rossi and Attilio Pizzigoni. Beda Ring, PhD researcher, constructs a Campy renovation of one of these row houses, full of theatricality, humor, and significant otherness; while architectural pedagogue, Brady Burroughs, guides a student group from KTH in an Architecture and Gender course; and Henri T. Beall, practicing architect, attends to the details upstairs.

Crisis Jane Golley 2021-04-21 The year 2020 was marked by a series of rolling crises. The Australian

wildfires at the start of the year were a catastrophic sign of the global climate crisis. Xi Jinping's announcement in September that the People's Republic of China would become carbon neutral by 2060 could help alleviate the crisis, but China has to fix its coal problem first. The big story was, of course, the global COVID-19 pandemic. Appearing to originate in a Wuhan wet market, by year's end the pandemic had claimed nearly 2 million lives worldwide, put whole countries into lockdown, and sent economies around the world tumbling into recession. China itself successfully suppressed the disease at home and recorded positive economic growth for the year — proving, at least according to the Chinese Communist Party, the 'superiority of the socialist system'. Not everyone was convinced, with persistent questions about the CCP's initial cover up of the outbreak, and how the lack of transparency helped it become a pandemic in the first place. The China Story Yearbook 2020: Crisis surveys the multiple crises of the year of the Metal Rat, including the catastrophic mid-year floods that sparked fears about the stability of the Three Gorges Dam. It looks at how Chinese women fared through the pandemic, from the rise in domestic violence to portraits of female sacrifice on the medical front line to the trolling of a famous dancer for being childless. It also examines the downward-spiralling Sino-Australian relationship, the difficult 'co-morbidities' of China's relations with the US, the end of 'One Country, Two Systems' in Hong Kong, the simmering border conflict with India, and the rise of pandemic-related anti-Chinese racism. The Yearbook also explores the responses to crisis of, among others,

Daoists, Buddhists, and humourists — because when all else fails, there's always philosophy, prayer, and laughter. The Scientification of Religion Kocku von Stuckrad 2014-05-21 The enigmatic relation between religion and science still presents a challenge to European societies and to ideas about what it means to be 'modern.' This book argues that European secularism, rather than pushing back religious truth claims, in fact has been religiously productive itself. The institutional establishment of new disciplines in the nineteenth century, such as religious studies, anthropology, psychology, classical studies, and the study of various religious traditions, led to a professionalization of knowledge about religion that in turn attributed new meanings to religion. This attribution of meaning resulted in the emergence of new religious identities and practices. In a dynamic that is closely linked to this discursive change, the natural sciences adopted religious and metaphysical claims and integrated them in their framework of meaning, resulting in a special form of scientific religiosity that has gained much influence in the twentieth century. Applying methods that come from historical discourse analysis, the book demonstrates that religious semantics have been reconfigured in the secular sciences. Ultimately, the scientification of religion perpetuated religious truth claims under conditions of secularism.

The Futurist Moment Marjorie Perloff 2003-12-03 This volume examines the flourishing of Futurist aesthetics in the European art and literature of the early twentieth century. Futurism was an artistic and social movement that was largely an Italian phenomenon, though there

were parallel movements in Russia, England and elsewhere. The Futurists admired speed, technology, youth and violence, the car, the airplane and the industrial city, all that represented the technological triumph of humanity over nature. This work looks at the prose, visual art, poetry, and the manifestos of Futurists from Russia to Italy. The author reveals the Moment's impulses and operations, tracing its echoes through the years to the work of "postmodern" figures like Roland Barthes. This updated edition reexamines the Futurist Moment in the light of a new century, in which Futurist aesthetics seem to have steadily more to say to the present.

Ulysses and Us Declan Kiberd 2010 Explores the lessons that modern readers can draw from Joyce's classic work, revealing how "Ulysses" presents a vision of a more tolerant and decent society in which the seemingly banal hero, Leopold Bloom, represents ordinary wisdom that can offer a model for living.
