Commanders' Survey Adela A. Frame 1997 "The School for Command Preparation, Command and General Staff College, Fort Leavenworth, KS provides three sequential courses for battalion and brigade command selectees. All command designees attend the PreCommand Course (PCC). PCC provides common understanding of current doctrine, and up-to-date information on Army-wide policy, programs and special items of interest. In conjunction with PCC, spouses are invited to attend the Command Team Seminar (CTS). With commanders, they gain awareness of issues that impact families, the unit, and the community. The remaining two courses, the Tactical Commanders' Development Course (TCDC), and the Battle Commanders' Development Course (BCDC) emphasize warfighting skills and the art of battle command for tactical leaders. The Fort Leavenworth Research Unit developed a survey instrument to obtain commanders' assessment of courses following assignment to their commands. Commanders who had attended these courses in the previous 2 years were solicited for feedback. They gauged the usefulness of topics presented, and indicated their level of agreement with statements regarding the courses. They were asked what issues they felt were not addressed during the course and what they would share with incoming commanders. Responses (N=254) were compiled and analyzed. All courses received positive evaluations. Many commanders desired discussions with experienced commanders to cover OPTEMPO, resource constraints, and personnel management issues. Feedback provided useful suggestions and current trends."--DTIC.

My Promised Land Ari Shavit 2013-11-19 NEW YORK TIMES BESTSELLER • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW AND THE ECONOMIST Winner of the Natan Book Award, the National Jewish Book Award, and the Anisfield-Wolf Book Award An authoritative and deeply personal narrative history of the State of Israel, by one of the most influential journalists writing about the Middle East today Not since Thomas L. Friedman's groundbreaking From Beirut to Jerusalem has a book captured the essence and the beating heart of the Middle East as keenly and dynamically as My Promised Land. Facing unprecedented internal and external pressures, Israel today is at a moment of existential crisis. Ari Shavit draws on interviews, historical documents, private diaries, and letters, as well as his own family's story, illuminating the pivotal moments of the Zionist century to tell a riveting narrative that is larger than the sum of its parts: both personal and national, both deeply human and of profound historical dimension. We meet Shavit's great-grandfather, a British Zionist who in 1897 visited the Holy Land on a Thomas Cook tour and understood that it was the way of the future for his people; the idealist young farmer who bought land from his Arab neighbor in the 1920s to grow the Jaffa oranges that would create Palestine's booming economy; the visionary youth group leader who, in the 1940s, transformed Masada from the neglected ruins of an extremist sect into a powerful symbol for Zionism; the Palestinian who as a young man in 1948 was driven with his family from his home during the expulsion from Lydda; the immigrant orphans of Europe's Holocaust, who took on menial work and focused on raising their children to become the leaders of the new state; the pragmatic engineer who was instrumental in developing Israel's nuclear program in the 1960s, in the only interview he ever gave; the zealous religious Zionists who started the settler movement in the 1970s; the dot-com entrepreneurs and young men and women behind Tel-Aviv's booming club scene; and today's architects of Israel's foreign policy with Iran, whose nuclear threat looms ominously over the tiny country. As it examines the complexities and contradictions of the Israeli condition, My Promised Land asks difficult but important questions: Why did Israel come to be? How did it come to be? Can Israel survive? Culminating with an analysis of the issues and threats that Israel is currently facing, My Promised Land uses the defining events of the past to shed new light on the present. The result is a landmark portrait of a small, vibrant country living on the edge, whose identity and presence play a crucial

role in today's global political landscape. Praise for My Promised Land "This book will sweep you up in its narrative force and not let go of you until it is done. [Shavit's] accomplishment is so unlikely, so total . . . that it makes you believe anything is possible, even, God help us, peace in the Middle East."—Simon Schama, Financial Times "[A] must-read book."—Thomas L. Friedman, The New York Times "Important and powerful . . . the least tendentious book about Israel I have ever read."—Leon Wieseltier, The New York Times Book Review "Spellbinding . . . Shavit's prophetic voice carries lessons that all sides need to hear."—The Economist "One of the most nuanced and challenging books written on Israel in years."—The Wall Street Journal

Opportunities in Neuroscience for Future Army Applications National Research Council 2009-07-16 Advances and major investments in the field of neuroscience can enhance traditional behavioral science approaches to training, learning, and other applications of value to the Army. Neural-behavioral indicators offer new ways to evaluate how well an individual trainee has assimilated mission critical knowledge and skills, and can also be used to provide feedback on the readiness of soldiers for combat. Current methods for matching individual capabilities with the requirements for performing high-value Army assignments do not include neuropsychological, psychophysiological, neurochemical or neurogenetic components; simple neuropsychological testing could greatly improve training success rates for these assignments.

Opportunities in Neuroscience for Future Army Applications makes 17 recommendations that focus on utilizing current scientific research and development initiatives to improve performance and efficiency, collaborating with pharmaceutical companies to employ neuropharmaceuticals for general sustainment or enhancement of soldier performance, and improving cognitive and behavioral performance using interdisciplinary approaches and technological investments. An essential guide for the Army, this book will also be of interest to other branches of military, national security and intelligence agencies, academic and commercial researchers, pharmaceutical companies, and others interested in applying the rapid advances in neuroscience to the performance of individual and group tasks.

Army Leadership and the Profession (ADP 6-22) Headquarters Department of the Army 2019-10-09 ADP 6-22 describes enduring concepts of leadership through the core competencies and attributes required of leaders of all cohorts and all organizations, regardless of mission or setting. These principles reflect decades of experience and validated scientific knowledge. An ideal Army leader serves as a role model through strong intellect, physical presence, professional competence, and moral character. An Army leader is able and willing to act decisively, within superior leaders' intent and purpose, and in the organization's best interests. Army leaders recognize that organizations, built on mutual trust and confidence, accomplish missions. Every member of the Army, military or civilian, is part of a team and functions in the role of leader and subordinate. Being a good subordinate is part of being an effective leader. Leaders do not just lead subordinates—they also lead other leaders. Leaders are not limited to just those designated by position, rank, or authority.

TRADOC Pamphlet TP 600-4 The Soldier's Blue Book United States Government Us Army 2019-12-14 This manual, TRADOC Pamphlet TP 600-4 The Soldier's Blue Book: The Guide for Initial Entry Soldiers August 2019, is the guide for all Initial Entry Training (IET) Soldiers who join our Army Profession. It provides an introduction to being a Soldier and Trusted Army Professional, certified in character, competence, and commitment to the Army. The pamphlet introduces Soldiers to the Army Ethic, Values, Culture of Trust, History, Organizations, and Training. It provides information on pay, leave, Thrift Saving Plans (TSPs), and organizations that will be available to assist you and your Families. The Soldier's Blue Book is mandated reading and will be maintained and available during BCT/OSUT and AIT. This pamphlet applies to all active Army, U.S. Army Reserve, and the Army National Guard enlisted IET conducted at service schools, Army Training Centers, and other training activities under the control of Headquarters, TRADOC.

Adopting Mission Command Donald E. Vandergriff 2019-09-15 In September 2010, James G. Pierce, a retired U.S. Army colonel with the Strategic Studies Institute at the U.S. Army War College in Carlisle Barracks, Pennsylvania, published a

study on Army organizational culture. Pierce postulated that "the ability of a professional organization to develop future leaders in a manner that perpetuates readiness to cope with future environmental and internal uncertainty depends on organizational culture." He found that today's U.S. Army leadership "may be inadequately prepared to lead the profession toward future success." The need to prepare for future success dovetails with the use of the concepts of mission command. This book offers up a set of recommendations, based on those mission command concepts, for adopting a superior command culture through education and training. Donald E. Vandergriff believes by implementing these recommendations across the Army, that other necessary and long-awaited reforms will take place.

Decision-Making Under Stress Eduardo Salas 2017-03-02 In our high technology society, there is a growing demand for a better understanding of decision making in high risk situations in order to improve selection, training and operational performance. Decision Making Under Stress presents a state-of-the-art review of psychological theory, in research and practice, on decision making in high pressure and emergency situations. It focuses on the experienced decision makers who deal with such risks, principally on flight decks, at civil emergencies, in industrial settings and military environments. The 29 chapters cover a wide range of perspectives and applications from aviation, military, industry and the emergency services. The authors, all international invited experts in their field, are based in research centers and universities from Europe, North America and Australia. Their common interest is in the theories and methods of a new research domain called NDM (naturalistic decision making). This volume comprises the edited contributions to the Third International NDM conference, sponsored by the US Army Research Institute and the US Naval Air Warfare Center, which was held in Aberdeen, Scotland in September 1996. The NDM researchers are interested in decision making in situations characterised by high risk, time pressure, uncertain goals, ambiguous information and teamwork. The extent to which the NDM approach can explain and predict human performance in such settings is a central theme, discussed with many practical examples and applications. This book is essential reading for applied psychologists, pilots, emergency commanders, military officers, high hazard managers, safety and emergency response professionals.

National Library of Medicine AVLINE Catalog National Library of Medicine (U.S.) 1975 Listing of audiovisual materials catalogued by NLM. Items listed were reviewed under the auspices of the American Association of Dental Schools and the Association of American Medical Colleges, and are considered suitable for instruction.
