Astronaut Lucy M. George 2017-09-21 What's it really like to be an astronaut? Find out in this delightful picture book and discover the everyday and extraordinary events of life on a space station. A fun and fascinating first guide to a most exciting and unusual profession. It's a busy day for astronauts Jenny, Chen and Kim. They are going to the space station on an important mission. The crew are there to help them but what is wrong with Robo-bot? Digital Apollo David A. Mindell 2011-09-30 How human pilots and automated systems worked together to achieve the ultimate in flight—the lunar landings of NASA's Apollo program. As Apollo 11's Lunar Module descended toward the moon under automatic control, a program alarm in the guidance computer's software nearly caused a mission abort. Neil Armstrong responded by switching off the automatic mode and taking direct control. He stopped monitoring the computer and began flying the spacecraft, relying on skill to land it and earning praise for a triumph of human over machine. In Digital Apollo, engineer-historian David Mindell takes this famous moment as a starting point for an exploration of the relationship between humans and computers in the Apollo program. In each of the six Apollo landings, the astronaut in command seized control from the computer and landed with his hand on the stick. Mindell recounts the story of astronauts' desire to control their spacecraft in parallel with the history of the Apollo Guidance Computer. From the early days of aviation through the birth of spaceflight, test pilots and astronauts sought to be more than “spam in a can” despite the automatic controls, digital computers, and software developed by engineers. Digital Apollo examines the design and execution of each of the six Apollo moon landings, drawing on transcripts and data telemetry from the flights, astronaut interviews, and NASA's extensive archives. Mindell's exploration of how human pilots and automated systems worked together to achieve the ultimate in flight—a lunar landing—traces and reframes the debate over the future of humans and automation in space. The results have implications for any venture in which human roles seem threatened by automated systems, whether it is the work at our desktops or the future of exploration.

Grant and Tillie Go Walking Monica Kulling 2015-07-25 Grant Wood believed that to be a real artist, he had to live in Paris. Inspired by the life of artist Grant Wood, this is the sensitively imagined story of the great American painter and a cow named Tillie. Skillfully mixing fact with fiction, Monica Kulling's text explores the making of an artist, while Sydney Smith's illustrations echo Grant Wood's own techniques. Board Member Orientation Michael E. Batts 2011-02-01 Finally! Board member orientation truly simplified. Serving on a nonprofit board can be an incredibly rewarding experience for the properly prepared board member. This book is for the generous and busy people who agree to give of their time and talents by serving on nonprofit boards. Nonprofit boards often fail to do a good job of board member orientation for a variety of reasons. It takes a significant amount of time and effort to plan and conduct quality board member orientation programs, and every time a new board member arrives, it's time to do it again! Because of the challenges associated with providing quality board member orientation, many nonprofit organizations do not do it at all, leaving their board members to wing it. This book provides help and support to the truly great men and women serving on nonprofit boards whose service makes a positive difference in the lives of countless people every day. This book is a concise and appropriately comprehensive guide to nonprofit board service designed especially for new board members. It is a quick read, (about one hour), yet it addresses with accuracy the most significant elements of board service, such as mission, responsibility, duty, risk, liability, and board meeting dynamics. Hooey Alerts! Watch for Hooey Alerts! where the author identifies and dispels common myths and legends about nonprofit board service. There are many sources of false or misleading information about the nonprofit board service environment. A perfect example is the often vaguely-worded and intimidating assertion or implication that the Sarbanes-Oxley Act passed by Congress in 2002 applies to nonprofit organizations in a manner similar to how it applies to publicly-traded companies. (It does not.) Reviews "This book is the perfect guide for every nonprofit board member! Concise, highly informative, and loaded with nuggets of wisdom, it's a must read that will take board members to the next level of successful board governance." -- J. Todd Chasteen, General Counsel, Samaritan's Purse "Mike Batts has put his quarter century of advising and serving on nonprofit boards to good use in this accurate and easy-to-read book. In addition to describing major principles of nonprofit law and governance, the book provides helpful questions to guide board members in understanding the practical applications of the concepts discussed. While geared primarily toward helping new board members get up to speed quickly, it should also help veteran board members discharge their stewardship roles wisely and efficiently." -- Chuck Hartman, Associate Professor of Business Law and Accounting, Cedarville University "This book, Board Member Orientation, is exactly what a busy volunteer board member needs. The board member's duties are presented in a clear and concise manner from the perspective of someone who has been around many boards. With a focus on those issues that are most common and/or most important, it is perfect for board member orientation and for quick reference reminders for the experienced board member." -- Doug Starcher, Partner, Broad & Cassel "This book provides clear, no-nonsense guidance on the basic issues for new nonprofit board members. Using this book for board member orientation will ensure your organization has communicated fundamental governance issues and will assist the board in determining risk management strategies." -- Dan Busby, President, ECFA ***** The Simple Board Member Orientation Process Using This Book: 1. Your board members read Chapters 1-9 of the book, which will provide them with insights regarding the key elements of nonprofit board service. 2. You provide the board members with copies of the documents described in Chapter 10 related to your organization. 3. You meet with your board members to discuss the unique attributes of your organization following the discussion questions provided in Chapter 10. Done!

Through the Glass Ceiling to the Stars Eileen M. Collins 2021-10-19 The long-awaited memoir of a trailblazer and role model who is telling her story for the first time. Eileen Collins was an aviation pioneer her entire career, from her crowning achievements as the first woman to command an American space mission as well as the first to pilot the space shuttle to her early years as one of the Air Force's first female pilots. Since retiring from the Air Force and NASA, she has served on numerous corporate boards and is an inspirational speaker about space exploration and leadership. Eileen Collins is among the most recognized and admired women in the world, yet this is the first time she has told her story in a book. It is a story not only of achievement and overcoming obstacles but of profound personal transformation. The shy, quiet child of an alcoholic father and struggling single mother, who grew up in modest circumstances and was an unremarkable student, she had few prospects when she graduated from high school, but she changed her life to pursue her secret dream of becoming an astronaut. The Dream Life of Astronauts Patrick Ryan 2016-07-05 For readers of Tom Perrotta and Lorrie Moore, these nine unforgettable stories, all set in and around Cape Canaveral, showcase Patrick Ryan's masterly understanding of regret and hope, relationships and family, and the universal longing for love. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY St. Louis Post Dispatch • Refinery 29 • Electric Literature The Dream Life of Astronauts balances heartbreak with wry humor as its characters try to make sense of the paths they find themselves on. A would-be Miss America auditions for a shady local talent scout over vodka and Sunny D; a NASA engineer begins to wonder if the woman he's having an affair with is slowly poisoning her husband; a Boy Scout troop leader, recovering from a stroke, tries to protect one of his scouts from being bullied by his own sons; an ex-mobster living in witness protection feuds with the busybody head of his condo board; a grandmother, sentenced to driver's ed after a traffic accident, surprises herself by falling for her instructor. Set against landmark moments—the first moon launch, Watergate, the Challenger explosion—these private dramas unfurl in startling ways. The Dream Life of Astronauts ratifies the emergence of an indelible new talent in fiction. Praise for The Dream Life of Astronauts "[Ryan] displays a gift for excavating the dashed hopes and yearnings that lie beneath. He is especially adept at capturing the point of view of children, with a Salingeresque understanding of their alienation, their vulnerability, their keen powers of observation."—Michiko Kakutani, The New York Times "Quietly commanding . . . A wry and smart collection—a beam of intelligent life from an author who clearly likes to probe the outer edges of the familiar."—Maureen Corrigan, NPR's Fresh Air "Ryan is a master of that old-fashioned, captivating storytelling that deceptively reads as effortless. . . . Ryan never actually sends his characters into space; but his orbits of the human heart are enough."—The New York Times Book Review "Ryan brings a wry sense of intimacy to these dreamers who are always searching for a better life, for something new."—BBC "Patrick Ryan's short stories go down lightly—but that doesn't mean they're lightweight. In the best of them, Ryan's transparent prose and seemingly casual tone sneakily ensnare you in tough moments and wryly rueful deflations of the heart and spirit."—The Seattle Times "You don't have to be a rocket scientist to appreciate this funny collection of stories set around Cape Canaveral. Moon missions and shuttle launches take a backseat to the earthly predicaments faced by the eclectic cast of Boy Scouts, gangsters, grandmothers and beauty queens."—The Atlanta Journal-Constitution "There is humanity and heart in each one of these tales, all rendered with nuance and depth that will leave a mark on your thoughts long past the final pages."—Refinery29 "Patrick Ryan's characters are people who are a little more beaten down than they know. They are not introspective by default, and yet, due to circumstances, they are forced to look into themselves and find something that, in his own phrase, feels like life."—Literary Hub "The author illuminates [his] characters with pitch-perfect dialogue and period references that capture the various decades in which the stories take place."—Publishers Weekly
