To Kill a Mockingbird Harper Lee 2014-07-08 Voted America's Best-Loved Novel in PBS's The Great American Read Harper Lee's Pulitzer Prize-winning masterwork of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred One of the most cherished stories of all time, To Kill a Mockingbird has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.
Advances in Intelligent Networking and Collaborative Systems Leonard Barolli 2017-08-14 The aim of this book is to provide the latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to intelligent social networks and collaborative systems, intelligent networking systems, mobile collaborative systems, secure intelligent cloud systems, etc., and to reveal synergies among various paradigms in the multi-disciplinary field of intelligent collaborative systems. It presents the Proceedings of the 9th International Conference on Intelligent Networking and Collaborative Systems (INCoS-2017), held on August 24–26, 2017 in Toronto, Canada. With the rapid evolution of the Internet, we are currently experiencing a shift from the traditional sharing of information and applications as the main purpose of the Web to an emergent paradigm that puts people at the very centre of networks and exploits the value of people's connections, relations and collaborations. Social networks are also pla ying a major role in the dynamics and structure of intelligent Web-based networking and collaborative systems. Virtual campuses, virtual communities and organizations effectively leverage intelligent networking and collaborative systems by tapping into a broad range of formal and informal electronic relations, such as business-to-business, peer-to-peer and many types of online collaborative learning interactions, including the emerging e-learning systems. This has resulted in entangled systems that need to be managed efficiently and autonomously. In addition, the latest and powerful technologies based on Grid and wireless infrastructure as well as Cloud computing are now greatly enhancing collaborative and networking applications, but are also facing new issues and challenges. The principal objective of the research and development community is to stimulate research that leads to the creation of responsive environments for networking and, in the longer-term, the developmen t of adaptive, secure, mobile, and intuitive intelligent systems for collaborative work and learning.

Constructing Research Questions Mats Alvesson 2013-02-01 All researchers want to produce interesting and influential theories. A key step in all theory development is formulating innovative research questions that will result in interesting and significant research. Traditional textbooks on research methods tend to ignore, or gloss over, actual ways of constructing research questions. In this text, Alvesson and Sandberg develop a problematization methodology for identifying and challenging the assumptions underlying existing theories and for generating research questions that can lead to more interesting and influential theories, using examples from across the social sciences. Established methods of generating research questions in the social sciences tend to focus on 'gap-spotting', which means that existing literature remains largely unchallenged. The authors show the dangers of conventional approaches, providing detailed ideas for how one can work through such problems and formulate novel research questions that challenge existing theories and produce more imaginative empirical studies. Constructing Research Questions is essential reading for any researcher looking to formulate research questions that are interesting and novel.

Slouching Towards Bethlehem Joan Didion 2017-03-21 The "dazzling" and essential portrayal of 1960s America from the author of South and West and The Year of Magical Thinking (The New York Times). Capturing the tumultuous landscape of the United States, and in particular California, during a pivotal era of social change, the first work of nonfiction from one of American literature's most distinctive prose stylists is a modern classic. In twenty razor-sharp essays that redefined the art of journalism, National Book Award–winning author Joan Didion reports on a society gripped by a deep generational divide, from the "misplaced children" dropping acid in San Francisco's Haight-Ashbury district to Hollywood legend John Wayne filming his first picture after a bout with cancer. She paints indelible portraits of reclusive billionaire Howard Hughes and folk singer Joan Baez, "a personality before she was entirely a person," and takes readers on eye-opening journeys to Death Valley, Hawaii, and Las Vegas, "the most extreme and allegorical of American settlements." First published in 1968, Slouching Towards Bethlehem has been heralded by the New York Times Book Review as "a rare display of some of the best prose written today in this country" and named to Time magazine's list of the one hundred best and most influential nonfiction books. It is the definitive account of a terrifying and transformative decade in American history whose discordant reverberations continue to sound a half-century later.

Politics and the English Language George Orwell 2021-01-01 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Politics and the English Language, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's Politics and the English Language is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' — Irish Times

Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Scholarly Writing Jessica L. Clark 2012 In addition to a standard first-year legal writing curriculum, most law schools now require upperlevel students to write a sophisticated legal research paper on a topic of their choice. Students often struggle through the scholarly writing process, from finding a topic to polishing a final paper, and many never fully develop and defend a thesis. Scholarly Writing: Ideas, Examples, and Execution offers a lifeline to students, guiding them through the process of constructing their legal research papers from start to finish.With over 10 years combined experience teaching scholarly writing to J.D. and LL.M. students, the authors identify common roadblocks for student writers, and offer advice and techniques for how to successfully overcome these roadblocks. The book walks students through a five-step process for researching and writing scholarly papers and follows five published student papers from idea to final execution as a method of illustrating the principles advocated in the text. This example-based approach sets this book apart from others; the authors not only tell students how to approach their papers, but through annotated excerpts of example papers, they show students how to approach their papers. The book includes up-to-date information about legal research and organizational tools. It also includes "bright ideas" that supplement the text with ideas and examples for student writers. The text may be used as either a required text for a course in Scholarly Legal Writing or a companion guide for students working on scholarly legal writing projects independently.

Pitching Research Evolution Robert W. Faff 2016 As a visiting exchange student to the University of Queensland from China, Jie Teng, approached the 1st author inquiring about opportunities for research projects. Recognizing that the student had only limited exposure to research and an unknown appreciation of what it entails, the mentor devised a program of incremental "discovery" and learning, based on Faff's (2015, 2016) "pitching research" template tool. Under close guidance, Jie was asked to choose a recent academic paper of interest to him and then to reverse engineer a "pitch" for that chosen paper. The target for this exercise was Acharya and Xu (2013, NBER) (now a forthcoming paper in Journal of Financial Economics, Acharya and Xu 2016): a paper examining the topic of "Innovation and Financial Dependence". The pitching process was completed, in 10 small stages, over a period of about 5 weeks. The current paper provides a narrative of this research journey aimed at helping other research mentors facing similar situations.
