

From Revolution To Reform In China Guided Reading Answers

Getting the books From Revolution To Reform In China Guided Reading Answers now is not type of challenging means. You could not lonely going in imitation of book buildup or library or borrowing from your associates to entrance them. This is an entirely simple means to specifically acquire guide by on-line. This online broadcast From Revolution To Reform In China Guided Reading Answers can be one of the options to accompany you behind having new time.

It will not waste your time. resign yourself to me, the e-book will completely spread you additional event to read. Just invest little mature to read this on-line message From Revolution To Reform In China Guided Reading Answers as well as evaluation them wherever you are now.

Ideas for China's Future Weiyang Zhang 2020-07-13 This book attempts to convey that ideas matter and China needs right ideas to defeat wrong ideas and to guide its future reform. The successes that China has accomplished over the last 40 years of reform and opening were the result of ideas defeating interests. After the end of the "Cultural Revolution," Deng Xiaoping initiated market-oriented Reform and Opening because he had new ideas. While China has made great progress in both economic and social development since the beginning of reform and opening, there is still a long way to go to become a liberal society. Although the ideas of political leaders are crucial in the short term for social transformation to take place, the ideas of the common people play a more important role in the long term. The types of new ideas that China needs are proposed in this book.

Social Ethics in a Changing China Huaihong He 2015-10-13 Over the past half-century, China has experienced some incredible human dramas, ranging from Red Guard fanaticism and the loss of education for an entire generation during the Cultural Revolution, to the Tiananmen tragedy, the economic miracle, and its accompanying fad of money worship and the rampancy of official corruption. *Social Ethics in a Changing China: Moral Decay or Ethical Awakening?* provides a rich empirical narrative and thought-provoking scholarly arguments, highlighting the imperative for an ethical discourse in a country that is increasingly seen by many as both a materialistic giant and a spiritual dwarf. Professor He Huaihong was not only an extraordinary firsthand witness to all of these dramas, he played a distinct role as a historian, an ethicist, and a social critic exploring the deeper intellectual and sociological origins of these events. Incorporating ethical theories with his expertise in culture, history, religion, literature, and politics of the country, He reviews the remarkable transformation of ethics and morality in the People's Republic of China and engages in a global discourse about the major ethical issues of our time. The book aims to reconstruct Chinese social ethics in an innovative philosophical framework, reflecting China's search for new virtues. Contents 1.

Reconstructing China's Social Ethics 2. Historical and Sociological Origins of Chinese Cultural Norms 3. The Transformation of Ethics and Morality in the PRC 4. China's Ongoing Moral Decay? 5. Ethical Discourse in Reform Era China 6. Chinese Ethical Dialogue with the West and the World

China Under Mao Andrew G. Walder 2015-04-06 China's Communist Party seized power in 1949 after a long guerrilla insurgency followed by full-scale war, but the revolution was just beginning. Andrew Walder narrates the rise and fall of the Maoist state from 1949 to 1976—an epoch of startling accomplishments and disastrous failures, steered by many forces but dominated above all by Mao Zedong.

From Empire to Nation State Yan Sun 2020-08-31 Many scholars perceive ethnic politics in China as an untouchable topic due to lack of data and contentious, even prohibitive, politics. This book fills a gap in the literature, offering a historical-political perspective on China's contemporary ethnic conflict. Yan Sun accumulates research via field trips, local reports, and policy debates to reveal rare knowledge and findings. Her long-time causal chain of explanation reveals the roots of China's contemporary ethnic strife in the centralizing and ethnicizing strategies of its incomplete transition to a nation state—strategies that depart sharply from its historical patterns of diverse and indirect rule. This departure created the institutional dynamics for politicized identities and ethnic mobilization, particularly in the outer regions of Tibet and Xinjiang. In the 21st century, such factors as the demise of socialist tenets and institutions that upheld interethnic solidarity, and the rise of identity politics and developmentalism, have intensified these built-in tensions.

Land Reform in China and North Vietnam Edwin E. Moise 1983 This first book to consider land reform in both countries show that reform, as the Communists have conducted it, can be justified in China and North Vietnam for both economic reasons and ideological imperatives. Moise argues that the violence associated with land reform was as much a function of the social inequities that preceded reform as it was of the reform policy itself and explains the difficulties the Communist leaders encountered in developing a successful program. Originally published in 1983. A UNC Press Enduring Edition -- UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print. These editions are published unaltered from the original, and are presented in affordable paperback formats, bringing readers both historical and cultural value.

China's Economic Transformation Gregory C. Chow 2015-03-16 Revised edition of the author's *China's economic transformation* 2007.

The Third Revolution Elizabeth Economy 2018 "A Council on Foreign Relations Book"--Title page.

Rhetoric of the Chinese Cultural Revolution Xing Lu 2004 Now known to the Chinese as the "ten years of chaos," the Chinese Cultural Revolution (1966-1976) brought death to thousands and persecution to millions. Xing Lu identifies the rhetorical features and explores the persuasive effects of political language and symbolic practices during the period. She examines how leaders of the Communist Party enacted a rhetoric in political contexts to legitimize power and violence and to dehumanize a group of people identified as class enemies.

The Cultural Revolution on Trial Alexander C. Cook 2016-11-07 Introduction -- Indictment -- Monsters -- Testimony -- Emotions -- Verdict -- Vanity -- Conclusion -- Index of Chinese terms

Power and Protest Jeremi Suri 2003 Though reflecting traditional balance of power considerations, detente thus also developed from a common urge for stability among leaders who by the late

1960s were worried about increasingly threatening domestic social activism."

Economic Reform and Internationalisation Stephen Howes 1992

From Reform to Revolution Minxin Pei 1994 The author concludes with provocative statements about regime transition from communism. He rejects the idealistic notion that democratization can, by itself, remove the structural obstacles to economic transformation, and he sees high economic and political costs as unavoidable in transition from communism along either the Soviet or the Chinese path.

Chinese Education and Society A Bibliographic Guide Stewart E Fraser 2017-07-28 This title was first published in 1972: This bibliography is the most comprehensive and up-to-date reference work available on developments in Chinese education since 1966. In addition to primary materials from the people's Republic of China, the entries are drawn from other Asian sources, as well as from American and European studies. All levels and major fields of education are covered, and the pervasive impact of ideology and politics on education is carefully documented. Most entries are fully annotated, and many are cross listed. Professors Fraser and Hsu have prepared a lengthy introduction which provides valuable information on the research centers, journals and publishing/translating agencies active in the field.

Mao: A Very Short Introduction Delia Davin 2013-04-25 As a giant of 20th century history, Mao Zedong played many roles: peasant revolutionary, patriotic leader against the Japanese occupation, Marxist theoretician, modernizer, and visionary despot. This Very Short Introduction chronicles Mao's journey from peasant child to ruler of the most populous nation on Earth. He was a founder of both the Chinese Communist Party and the Red Army, and for many years he fought on two fronts, for control of the Party and in an armed struggle for the Party's control of the country. His revolution unified China and began its rise to world power status. He was the architect of the Great Leap Forward that he hoped would make China both prosperous and egalitarian, but instead ended in economic disaster resulting in millions of deaths. It was Mao's growing suspicion of his fellow leaders that led him to launch the Cultural Revolution, and his last years were dogged by ill-health and his despairing attempts to find a successor whom he trusted. Delia Davin provides an invaluable introduction to Mao, showing him in all his complexity; ruthless, brutal, and ambitious, a man of enormous talent and perception, yet a leader who is still detested by some and venerated by others. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Unlikely Partners Julian Gewirtz 2017-01-02 With Deng Xiaoping's blessing, Mao's successors scoured the globe for fresh ideas to launch domestic prosperity and global economic power. Yet China's government did not publicize its engagement with Western-style innovations, claiming instead that economic reinvention was the Party's achievement alone. Julian Gewirtz sets forth the truer story.

A Bitter Revolution Rana Mitter 2005 China is now poised to take a key role on the world stage, but in the early twentieth century the situation could not have been more different. Rana Mitter goes back to this pivotal moment in Chinese history to uncover the origins of the painful transition from a premodern past into a modern world. By the 1920s the seemingly civilized world shaped over the last two thousand years by the legacy of the great philosopher Confucius was falling apart in the face of western imperialism and internal warfare. Chinese cities still bore the imprints of its ancient past with narrow, lanes and temples to long-worshipped gods, but these were starting to change with the influx of foreign traders, teachers, and missionaries, all eager to shape China's ancient past into a modern present. Mitter takes us through the resulting social turmoil and political promise, the devastating war against Japan in the 1940s, Communism and the Cultural Revolution of the 1960s, and the new era of hope in the 1980s ended by the Tian'anmen uprising. He reveals the impetus behind the dramatic changes in Chinese culture and politics as being China's "New Culture" - a strain of thought which celebrated youth, individualism, and the heady mixture of strange and seductive new cultures from places as far apart as America, India, and Japan.

Print and Politics Joan Judge 1996 Print and Politics offers a cultural history of a late Qing newspaper, *Shibao*, the most influential reform daily of its time. Exploring the simultaneous emergence of a new print culture and a new culture of politics in early-twentieth-century China, the book treats *Shibao* as both institution and text and demonstrates how the journalists who wrote for the paper attempted to stake out a "middle realm" of discourse and practice. Chronicling the role these journalists played in educational and constitutional organizations, as well as their involvement in major issues of the day, it analyzes their essays as political documents and as cultural artifacts. Particular attention is paid to the language the journalists used, the cultural constructs they employed to structure their arguments, and the multiple sources of authority they appealed to in advancing their claims for reform.

Women, the Family, and Peasant Revolution in China Kay Ann Johnson 2009-02-15 Kay Ann Johnson provides much-needed information about women and gender equality under Communist leadership. She contends that, although the Chinese Communist Party has always ostensibly favored women's rights and family reform, it has rarely pushed for such reforms. In reality, its policies often have reinforced the traditional role of women to further the Party's predominant economic and military aims. Johnson's primary focus is on reforms of marriage and family because traditional marriage, family, and kinship practices have had the greatest influence in defining and shaping women's place in Chinese society. Conversant with current theory in political science, anthropology, and Marxist and feminist analysis, Johnson writes with clarity and discernment free of dogma. Her discussions of family reform ultimately provide insights into the Chinese government's concern with decreasing the national birth rate, which has become a top priority. Johnson's predictions of a coming crisis in population control are borne out by the recent increase in female infanticide and the government abortion campaign.

A Glossary of Political Terms of the People's Republic of China Gucheng Li 1995 "A glossary of political terms of the People's Republic of China is a collection of 560 important and frequently-used Chinese political terms and phrases that appeared between 1949 and 1990. Each entry begins with an explanation of the term and its origin, a description of how and under what circumstances the term was used, and a discussion of the changes of meaning over the years, as well as the political and social significance of the words."--Jacket.

Afterlives of Chinese Communism Christian Sorace 2019-06-25 Afterlives of Chinese Communism comprises essays from over fifty world-renowned scholars in the China field, from various disciplines and continents. It provides an indispensable guide for understanding how the Mao era continues to shape Chinese politics today. Each chapter discusses a concept or practice from the Mao period, what it attempted to do, and what has become of it since. The authors respond to the legacy of Maoism from numerous perspectives to consider what lessons Chinese communism can

offer today, and whether there is a future for the egalitarian politics that it once promised.

Red China Blues (reissue) Jan Wong 2011-02-04 Jan Wong, a Canadian of Chinese descent, went to China as a starry-eyed Maoist in 1972 at the height of the Cultural Revolution. A true believer -- and one of only two Westerners permitted to enroll at Beijing University -- her education included wielding a pneumatic drill at the Number One Machine Tool Factory. In the name of the Revolution, she renounced rock and roll, hauled pig manure in the paddy fields, and turned in a fellow student who sought her help in getting to the United States. She also met and married the only American draft dodger from the Vietnam War to seek asylum in China. *Red China Blues* begins as Wong's startling -- and ironic -- memoir of her rocky six-year romance with Maoism that began to sour as she became aware of the harsh realities of Chinese communism and led to her eventual repatriation to the West. Returning to China in the late eighties as a journalist, she covered both the brutal Tiananmen Square crackdown and the tumultuous era of capitalist reforms under Deng Xiaoping. In a wry, absorbing, and often surreal narrative, she relates the horrors that led to her disillusionment with the "worker's paradise." And through the stories of the people -- an unhappy young woman who was sold into marriage, China's most famous dissident, a doctor who lengthens penises -- Wong creates an extraordinary portrait of the world's most populous nation. In setting out to show readers in the Western world what life is like in China, and why we should care, Wong reacquaints herself with the old friends -- and enemies -- of her radical past, and comes to terms with the legacies of her ancestral homeland.

China's Unfinished Economic Revolution Nicholas R. Lardy 1998-07-01 China's Unfinished Economic Revolution offers a fundamentally different interpretation of China's economic reform. The common view that China's gradualistic approach has served it well overlooks the fact that state-owned banks for the last two decades have channeled a large share of sharply rising household savings into what are mostly unreformed, money-losing companies. The result is that several of China's largest financial institutions now are insolvent. To avoid a major domestic banking crisis the book argues that China must recapitalize and restructure its domestic banking system and end the long-standing practice of making lending decisions based on political rather than economic criteria. Nicholas Lardy explains that this course will inevitably be costly in political terms, in part because it will lead for a time to a slower rate of economic growth. But the alternative is even less attractive—permanently slower growth, continued macroeconomic instability, an inability to meet the expectations of the international community for the opening of its domestic financial markets, and insufficient resources to deal with severe environmental deterioration, growing water shortages, and a rapidly aging population. This timely book also analyzes the new reform initiatives China has launched in the wake of the Asian financial crisis, suggests additional steps that must be taken, and evaluates the implications for U.S. policy.

The Compelling Ideal Jan Kiely 2014-05-27 In this groundbreaking volume, based on extensive research in Chinese archives and libraries, Jan Kiely explores the pre-Communist origins of the process of systematic thought reform or reformation (ganhua) that evolved into a key component of Mao Zedong's revolutionary restructuring of Chinese society. Focusing on ganhua as it was employed in China's prison system, Kiely's thought-provoking work brings the history of this critical phenomenon to life through the stories of individuals who conceptualized, implemented, and experienced it, and he details how these techniques were subsequently adapted for broader social and political use.

Socialism with Chinese Characteristics Roland Boer 2021-04-27 This book covers the whole system of Socialism with Chinese Characteristics, dealing with Deng Xiaoping's theory, the socialist market economy, a moderately well-off (Xiaokang) society, China's practice and theory of socialist democracy, human rights, and Xi Jinping's Marxism. In short, the resolute focus is the Reform and Opening-Up. Socialism with Chinese Characteristics is one of the most important global realities today. However, the concept and its practice remain largely misunderstood outside China. This book sets to redress such a lack of knowledge, by making available to non-Chinese speakers the sophisticated debates and conclusions in China concerning socialism with Chinese Characteristics. It presents this material in a way that is both accessible and thorough.

Educated Youth and the Cultural Revolution in China Martin Singer 2020-08 The Cultural Revolution was an emotionally charged political awakening for the educated youth of China. Called upon by aging revolutionary Mao Tse-tung to assume a "vanguard" role in his new revolution to eliminate bourgeois revisionist influence in education, politics, and the arts, and to help to establish proletarian culture, habits, and customs, in a new Chinese society, educated young Chinese generally accepted this opportunity for meaningful and dramatic involvement in Chinese affairs. It also gave them the opportunity to gain recognition as a viable and responsible part of the Chinese polity. In the end, these revolutionary youths were not successful in proving their reliability. Too "idealistic" to compromise with the bourgeois way, their sense of moral rectitude also made it impossible for them to submerge their factional differences with other revolutionary mass organizations to achieve unity and consolidate proletarian victories. Many young revolutionaries were bitterly disillusioned by their own failures and those of other segments of the Chinese population and by the assignment of recent graduates to labor in rural communes. *Educated Youth and the Cultural Revolution in China* reconstructs the events of the Cultural Revolution as they affected young people. Martin Singer integrates material from a range of factors and effects, including the characteristics of this generation of youths, the roles Mao called them to play, their resentment against the older generation, their membership in mass organizations, the educational system in which they were placed, and their perception that their skills were underutilized. To most educated young people in China, Singer concludes, the Cultural Revolution represented a traumatic and irreversible loss of political innocence, made yet more tragic by its allegiance to the unsuccessful campaign of an old revolutionary to preserve his legacy from the inevitable storms of history.

Rural Roots of Reform Before China's Conservative Change Lynn T. White III 2018-05-24 China's economic and military rise dominates discussions of the world's most populous country. Resilient authoritarian government is credited with great successes, but this book expands the discourse to include governance by village heads - who often ignored central politicians. Chinese reforms for prosperity started circa 1970 under rural and suburban leaders. They could act autonomously then because of unexpected political and technological opportunities. Their localization of power eroded socialist controls. Since 1990, central leaders have tried to reverse reforms made by resilient local bosses. New findings, especially from the Yangzi delta around Shanghai, challenge the top-down approach to thinking about governance. As Deng Xiaoping admitted, the nation's spurt of prosperity began in local communities rather than Beijing. Reforms for triple-cropping and rural industrialization started long before Mao's death (not in 1978, the date most writers cite). Country factories competed with state industries for materials and markets. Shortages by the 1980s led to inflation, government deficits, unofficial credit, unenforceable planning, illegal migrations, then international exports - and severe political tensions. After 1990, Party leaders sought policies to build a Leninist regime that is mostly post-socialist. These reactionary changes have lasted into the era of Xi Jinping. China's reforms and subsequent changes can be understood as results of unintended situations not just ideas, and local not just central politics. This book will interest students and scholars of Chinese, as well as any readers who wonder about comparative development.

Whither China? Jinglian Wu 2016 How has China maintained high-speed economic growth during the last 30-plus years and successfully transformed itself from a poor, backward, and developing

country into the world's second-largest economy? Is the economic growth sustainable given the lack of political and social reform? What challenges does China face today, and how will she deal with them to continue moving toward becoming a truly prosperous and modern society? Now standing at a crossroads, what is China's future direction? This text examines this topic.

Forging Reform in China Edward S. Steinfeld 1998-07-28 The greatest economic challenge facing China in the post-Deng era is the reform of unprofitable, state-owned enterprises that have never truly been forced to face the pressure of a bottom line or the threat of bankruptcy. *Forging Reform in China* explains how and why well-intentioned, market-oriented reform measures have not been sweepingly successful to date, and what it would take to achieve meaningful reform. This book makes a compelling argument that private ownership cannot work in China's current system until governance over complex economic factors has been established, that is, until credit is tightened and market selection processes made to work.

To Get Rich Is Glorious Jacques deLisle 2019-09-24 In 1978, China launched economic reforms that have resulted in one of history's most dramatic national transformations. The reforms removed bureaucratic obstacles to economic growth and tapped China's immense reserves of labor and entrepreneurial talent to unleash unparalleled economic growth in the country. In the four decades since, China has become the world's second-largest economy after the United States, and a leading force in international trade and investment. As the contributors to this volume show, China also faces daunting challenges in sustaining growth, continuing its economic transformation, addressing the adverse consequences of economic success, and dealing with mounting suspicion from the United States and other trade and investment partners. China also confronts risks stemming from the project to expand its influence across the globe through infrastructure investments and other projects under the Belt and Road Initiative. At the same time, China's current leader, Xi Jinping, appears determined to make his own lasting mark on the country and on China's use of its economic clout to shape the world around it.

The Long Game Rush Doshi 2021-06-11 For more than a century, no US adversary or coalition of adversaries - not Nazi Germany, Imperial Japan, or the Soviet Union - has ever reached sixty percent of US GDP. China is the sole exception, and it is fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want, does it have a grand strategy to achieve it, and what should the United States do about it? In *The Long Game*, Rush Doshi draws from a rich base of Chinese primary sources, including decades worth of party documents, leaked materials, memoirs by party leaders, and a careful analysis of China's conduct to provide a history of China's grand strategy since the end of the Cold War. Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential "strategies of displacement." Beginning in the 1980s, China focused for two decades on "hiding capabilities and biding time." After the 2008 Global Financial Crisis, it became more assertive regionally, following a policy of "actively accomplishing something." Finally, in the aftermath populist elections of 2016, China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase "great changes unseen in century." After charting how China's long game has evolved, Doshi offers a comprehensive yet asymmetric plan for an effective US response. Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar-for-dollar, ship-for-ship, or loan-for-loan.

A Social History of Maoist China Felix Wemheuer 2019-03-31 This new social history of Maoist China provides an accessible view of the complex and tumultuous period when China came under Communist rule.

Urban Land Reform in China Ling-hin Li 1999 This text provides an authoritative account of urban land reform in China, which is unique in merging the existing socialist landowner system with market mechanisms.

Radicalism, Revolution, and Reform in Modern China Catherine Lynch 2011-03-31 Representing a spectrum of current scholarship, this volume illuminates the relationship of China's radical past to its reformist present as China makes a way forward through contested visions of the future. It contributes new insights into Mao Zedong, including his surprising relations with the Dalai Lama, and into Communist legacies for the environment, the rural economy, and independent filmmaking as protest, at the same time posing the question of whether the radical past of envisioning new paths to a modern future has yet a role to play.

How China Became Capitalist R. Coase 2016-04-30 *How China Became Capitalist* details the extraordinary, and often unanticipated, journey that China has taken over the past thirty five years in transforming itself from a closed agrarian socialist economy to an indomitable economic force in the international arena. The authors revitalise the debate around the rise of the Chinese economy through the use of primary sources, persuasively arguing that the reforms implemented by the Chinese leaders did not represent a concerted attempt to create a capitalist economy, and that it was 'marginal revolutions' that introduced the market and entrepreneurship back to China. Lessons from the West were guided by the traditional Chinese principle of 'seeking truth from facts'. By turning to capitalism, China re-embraced her own cultural roots. *How China Became Capitalist* challenges received wisdom about the future of the Chinese economy, warning that while China has enormous potential for further growth, the future is clouded by the government's monopoly of ideas and power. Coase and Wang argue that the development of a market for ideas which has a long and revered tradition in China would be integral in bringing about the Chinese dream of social harmony.

Chinese Village, Socialist State Edward Friedman 1991-01-01 This portrait of social change in the North China plain depicts how the world of the Chinese peasant evolved during an era of war and how it in turn shaped the revolutionary process. The book is based on evidence gathered from archives and interviews with villagers and rural officials.

The China Reader Orville Schell 1999 *The China Reader: The Reform Era* is a compilation by two astute China watchers of the most important documents, articles, and statements on China from 1972 to the present. Here are the voices of the experts, from Chinese analyses of the fall of Soviet Communism to Western exposes of an ecological crisis that threatens global weather patterns into the next millennium. Here, too, are the artifacts of an era, from regulations to control Chinese cyber-space to a Party member's Orwellian justification of the military crackdown in Tiananmen Square. *The China Reader* is a guide to understanding a nation in the throes of change - a historic moment with profound implications for policy makers and markets from the Pacific Rim to Wall Street.

Land Wars Brian J. DeMare 2019 *Land Wars: The Story of China's Agrarian Revolution* explores how Mao's narrative of rural revolution became a reality, at great human cost.

Reform and Reaction in Post-Mao China Richard Baum 2018-09-18 The decade of the 1980s began in China with great expectations of the societal benefits of modernisation, and ended with gunfire in Tiananmen Square. This book, first published in 1991, presents essays that explore the political and economic reform policies that emerged in post-Mao China under Deng Xiaoping. In general,

they conclude that the advent of partial marketization and structural reform tended to magnify structural contradictions rather than solve them.

Reforming the Revolution Robert Benewick 1988 A guide to China since the death of Mao Zedong, explaining and assessing the political conflicts and developments of the post-Mao era and the dramatic economic transformations launched by the new leadership. International relations, education, health and literary revival are also considered.

Mao Jung Chang 2011-10-05 The most authoritative life of the Chinese leader ever written, Mao: The Unknown Story is based on a decade of research, and on interviews with many of Mao's close circle in China who have never talked before — and with virtually everyone outside China who had significant dealings with him. It is full of startling revelations, exploding the myth of the Long March, and showing a completely unknown Mao: he was not driven by idealism or ideology; his intimate and intricate relationship with Stalin went back to the 1920s, ultimately bringing him to power; he welcomed Japanese occupation of much of China; and he schemed, poisoned, and blackmailed to get his way. After Mao conquered China in 1949, his secret goal was to dominate the world. In chasing this dream he caused the deaths of 38 million people in the greatest famine in history. In all, well over 70 million Chinese perished under Mao's rule — in peacetime.
