U.S. Health in International Perspective National Research Council 2013-04-12 The United States is among the wealthiest nations in the world, but it is far from the healthiest. Although life expectancy and survival rates in the United States have improved dramatically over the past century, Americans live shorter lives and experience more injuries and illnesses than people in other high-income countries. The U.S. health disadvantage cannot be attributed solely to the adverse health status of racial or ethnic minorities or poor people: even highly advantaged Americans are in worse health than their counterparts in other, "peer" countries. In light of the new and growing evidence about the U.S. health disadvantage, the National Institutes of Health asked the National Research Council (NRC) and the Institute of Medicine (IOM) to convene a panel of experts to study the issue. The Panel on Understanding Cross-National Health Differences Among High-Income Countries examined whether the U.S. health disadvantage exists across the life span, considered potential explanations, and assessed the larger implications of the findings. U.S. Health in International Perspective presents detailed evidence on the issue, explores the possible explanations for the shorter and less healthy lives of Americans than those of people in comparable countries, and recommends actions by both government and nongovernment agencies and organizations to address the U.S. health disadvantage.

Growing Up Queer Kerry H. Robinson 2014 This study has found that 16% of young people who identify as lesbian, gay, bi, trans, intersex or queer have attempted suicide and 33% have harmed themselves as a result of widespread homophobic and transphobic harassment and violence in Australian society. More than 1000 young people aged between 16–27 years of age participated in the national research study, with almost two-thirds reporting homophobic or transphobic harassment or violence across different aspects of their lives, including in schools, families, the workplace, the streets and other public sites, such as sporting events. The findings of this study highlight the serious impact that homophobia, transphobia and heteronormativity can have on the health and well being of young people who are gender variant or sexuality diverse.--Website.

The Fiftieth Gate Mark Raphael Baker 2017-07-03 What right did I possess, as a child of survivors, to recreate an account of the Holocaust as if I was there? In writing *The Fiftieth Gate*, Mark Baker describes a journey from despair and death towards hope and life; it is the story of a son who enters his parents' memories and, inside the darkness, finds light. In his evocative prose, Baker takes us to this place of horror, and then brings us back to reflect on these events and remember: 'Never again'. Across the silence of fifty years, Baker and his family travel from Poland and Germany to Jerusalem and Melbourne, as the author struggles to uncover the mystery of his parents' survival: his father Yossel was imprisoned in concentration camps and his mother Genia was forced into hiding after the Jews of her village were murdered. Twenty years on from its first publication, *The Fiftieth Gate* remains an extraordinary book. It has become a classic and has now sold over 70,000 copies. In Baker's new introduction, he recalls his motivations for writing this important memoir, and highlights how the testimonial culture in Holocaust studies has spread to awareness of other genocides and our responsibility (and failure) to prevent them. As well as *The Fiftieth Gate*, *A Journey Through Memory*, a seminal book on his parents' experience during the Holocaust, Mark Raphael Baker has written a compelling memoir, *Thirty Days, A Journey to the End of Love*, about the recent death of his wife. He is Director of the Australian Centre for Jewish Civilisation and Associate Professor of Holocaust and Genocide Studies in the School at Monash University, Melbourne. 'Heartrending and beautiful...This simply written, subtly complex narrative is instantly recognisable as a masterpiece, and the reader is rewarded by the light it sheds.' Age 'Combining precise historical research and poetic eloquence, Mark Baker's *The Fiftieth Gate* remains the gold standard of second generation Holocaust memoirs on the occasion of its twentieth anniversary edition.' Christopher R. Browning 'Baker does with memory, what Rembrandt does with light. He uses it to model, to imagine, to illuminate, to astonish.' Philip Adams

Prisoners In 2013 E. Ann Carson 2014-10-30 This report presents final counts of prisoners under the jurisdiction of state and federal correctional authorities on December 31, 2013, collected by the National Prisoner Statistics Program. This includes the number of prison admissions, releases, noncitizen inmates, and inmates age 17 or younger in the custody of state or federal prisons. The report also presents prison capacity for each state and the Federal Bureau of Prisons and the offense and demographic characteristics of yearend federal and state prison populations. It finds a slight growth in the prison inmate population, indicating that more changes in sentencing practices are needed. The report also examines capacity and enhanced sentencing data from California state prisons between 2010 and 2013 to chart the progress of the state's Public Safety Realignment policy. Figures. Interactive Evaluation Practice Jean A. King 2012-04-12 You've taken your introduction to evaluation course and are about to do your first evaluation project. Where do you begin? *Interactive Evaluation Practice: Managing the Interpersonal Dynamics of Program Evaluation* helps bridge the gap between the theory of evaluation and its practice, giving students the specific skills they need to use in different evaluation settings. Jean A. King and Laurie Stevahn present readers with three organizing frameworks (derived from social interdependence theory from social psychology, evaluation use research, and the evaluation capacity building literature) for thinking about evaluation practice. These frameworks help readers track the various skills or strategies to use for distinctive evaluation situations. In addition, the authors provide explicit advice about how to solve specific evaluation problems. Numerous examples throughout the text bring interactive practice to life in a variety of settings.

Jersey Shore Impressionists Roy Pedersen 2013 Water and light have seduced artists through the years and the quality of these elements at the New Jersey Shore continues to attract artists to this day. Between the late 1800s and 1940, an

inspired group of painters were drawn to the New Jersey coastline, forming communities of artists. Jersey Shore Impressionists breaks new ground in the history of American art by recognizing the distinct influence of New Jersey and its Shore on impressionist era American painters. This book establishes – for the first time – a category of impressionist American painters who focused on, or were profoundly influenced by, the landscapes and seascapes of this Shore — from Sandy Hook and Highlands to the Barnegat Bay region to Cape May. “Not since 1964, nearly 50 years ago, and only once before that in 1938 has there been published a book on painters in New Jersey,” says the book’s author, Roy Pedersen. “Never until now has there appeared a survey of the regional impressionist painters of New Jersey. This book and the accompanying exhibition for the first time celebrate these unrecognized works into the history of New Jersey and American art.” Jersey Shore Impressionists is produced in conjunction with a 2013 exhibition at the Morven Museum & Garden in Princeton, NJ. The exhibition, titled “Coastal Impressions: Painters of the Jersey Shore, 1880-1940” seeks to examine how the New Jersey shore was home to artist colonies whose output rivaled that of the better-known colonies of Old Lyme and Cos Cob, Connecticut, and Bucks County, Pennsylvania. In a Foreword, Richard J. Boyle, former director of the Pennsylvania Academy of the Fine Arts, describes the foundation of art colonies, and how they traveled from origins in mid-nineteenth century France to the plein-air attraction of the Jersey Shore’s “special light.” The first art colony – at Manasquan – forms around 1880 as young artists fresh from European training in Germany, France and Italy begin to arrive, and the book includes work from these artists – Will Hicok Low, Theodore Robinson, Albert Grantley Reinhart, Charles Freeman and Caroline Coventry Haynes. The next generation – Edward Boulton, Ida Wells Stroud, Julius Golz – trained in America, join and form new colonies to paint the unique light as well as the activities of the Shore. The passionate work created by these artists stands as an important, but unsung, chapter of American Impressionism and is celebrated in this book, establishing the important contribution to American art in general, and New Jersey’s cultural heritage in particular.

Hag-Seed Margaret Atwood 2016-10-11 NEW YORK TIMES BESTSELLER • The beloved author of *The Handmaid’s Tale* reimagines Shakespeare’s final, great play, *The Tempest*, in a gripping and emotionally rich novel of passion and revenge. “A marvel of gorgeous yet economical prose, in the service of a story that’s utterly heartbreaking yet pierced by humor, with a plot that retains considerable subtlety even as the original’s back story falls neatly into place.”—*The New York Times Book Review* Felix is at the top of his game as artistic director of the Makeshiweg Theatre Festival. Now he’s staging a *Tempest* like no other: not only will it boost his reputation, but it will also heal emotional wounds. Or that was the plan. Instead, after an act of unforeseen treachery, Felix is living in exile in a backwoods hovel, haunted by memories of his beloved lost daughter, Miranda. And also brewing revenge, which, after twelve years, arrives in the shape of a theatre course at a nearby prison. Margaret Atwood’s novel take on Shakespeare’s play of enchantment, retribution, and second chances leads us on an interactive, illusion-ridden journey filled with new surprises and wonders of its own. Praise for Hag-Seed “What makes the book thrilling, and hugely pleasurable, is how closely Atwood hews to Shakespeare even as she casts her own potent charms, rap-composition included. . . . Part Shakespeare, part Atwood, Hag-Seed is a most delicate monster—and that’s ‘delicate’ in the 17th-century sense. It’s delightful.”—*Boston Globe* “Atwood has designed an ingenious doubling of the plot of *The Tempest*: Felix, the usurped director, finds himself cast by circumstances as a real-life version of Prospero, the usurped Duke. If you know the play well, these echoes grow stronger when Felix decides to exact his revenge by conjuring up a new version of *The Tempest* designed to overwhelm his enemies.”—*Washington Post* “A funny and heartwarming tale of revenge and redemption . . . Hag-Seed is a remarkable contribution to the canon.”—*Bustle*

The Oxford Latin Syntax Harm Pinkster 2015 The goal of this work is to present an up-to-date successor to Keuhner-Stegmann’s *Ausführliche Grammatik der lateinischen Sprache*, taking into account new editions of Latin texts with better knowledge of the manuscripts, the publication and study of texts unknown in Keuhner-Stegmann’s time, recent linguistic studies, and new methods and models in linguistics.

Disease Control Priorities, Third Edition (Volume 2) Robert Black 2016-04-11 The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in

children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

*The Saffron Kitchen* Yasmin Crowther 2007-08-28 In a powerful debut novel that moves between the crowded streets of London and the desolate mountains of Iran, Yasmin Crowther paints a stirring portrait of a family shaken by events from decades ago and worlds away. On a rainy day in London the dark secrets and troubled past of Maryam Mazar surface violently, with tragic consequences for her daughter, Sara, and her newly orphaned nephew. Maryam leaves her English husband and family and returns to the remote Iranian village where her story began. In a quest to piece their life back together, Sara follows her mother and finally learns the terrible price Maryam once had to pay for her freedom, and of the love she left behind. Set against the breathtaking beauty of two very different places, this stunning family drama transcends culture and is, at its core, a rich and haunting narrative about mothers and daughters.

*In the Event of Women* Tani Barlow 2021-10-22 *In the Event of Women* outlines the stakes of what Tani Barlow calls "the event of women." Focusing on the era of the late nineteenth century through the mid-twentieth century's Cultural Revolution, Barlow shows that an event is a politically inspired action to install a newly discovered truth, in this case the mammal origins of human social evolution. Highbrow and lowbrow social theory circulating in Chinese urban print media placed humanity's origin story in relation to commercial capital's modern advertising industry and the conclusion that women's liberation involved selling, buying, and advertising industrial commodities. The political struggle over how the truth of women in China would be performed and understood, Barlow shows, means in part that an event of women was likely global because its truth is vested in biology and physiology. In so doing, she reveals the ways in which historical universals are effected in places where truth claims are not usually sought. This book reconsiders Alain Badiou's concept of the event; particularly the question of whose political moment marks newly discovered truths.

*Thinking Its Presence* Dorothy J. Wang 2013-12-04 When will American poetry and poetics stop viewing poetry by racialized persons as a secondary subject within the field? Dorothy J. Wang makes an impassioned case that now is the time. *Thinking Its Presence* calls for a radical rethinking of how American poetry is being read today, offering its own reading as a roadmap. While focusing on the work of five contemporary Asian American poets—Li-Young Lee, Marilyn Chin, John Yau, Mei-mei Berssenbrugge, and Pamela Lu—the book contends that aesthetic forms are inseparable from social, political, and historical contexts in the writing and reception of all poetry. Wang questions the tendency of critics and academics alike to occlude the role of race in their discussions of the American poetic tradition and casts a harsh light on the double standard they apply in reading poems by poets who are racial minorities. This is the first sustained study of the formal properties in Asian American poetry across a range of aesthetic styles, from traditional lyric to avant-garde. Wang argues with conviction that critics should read minority poetry with the same attention to language and form that they bring to their analyses of writing by white poets.

*Human Factors Considerations of Undergrounds in Insurgencies* Us Army Special Operations Command 2017-08-31 From the preface: "The 1966 'Human Factors' edition focused on the contemporary threat of Maoist insurgencies, particularly in Southeast Asia, and also drew extensively on World War II resistance movements in Europe. Much of this information is still relevant and has been retained and integrated. In the post-Cold War world, the most important insurgencies tend to be ethnic and religious. Long-simmering conflicts, sometimes with roots in colonial policies, have become prominent; examples include the Liberation Tigers of Tamil Eelam (LTTE) in Sri Lanka, Euskadi Ta Askatasuna (Basque Homeland and Freedom or ETA) in Spain, the Hutu-Tutsi genocides, the Ushitia •lirimtare e Kosov•s (Kosovo Liberation Army, or KLA), and the Provisional Irish Republican Army (PIRA). Battle lines in these conflicts are often drawn along ethnic lines, even when land or politics are the immediate issues in contention. The other important new category is extremist religious movements, most prominently Islamic groups, including regional insurgent movements like Hizbollah and Harakat al-Muqawamah al'Isla•miyyah (Islamic Resistance Movement, or HAMAS) and global movements like Al Qaeda. These present a different profile of ideology, organizational forms, and psychology than either Cold War Maoists or post-colonial ethnic insurgencies (although the Palestinian cause could be considered a post-colonial issue). Globalization has also changed underground operations in numerous ways. Insurgencies, enabled by low-cost transportation, Internet based communications, and other information technologies, can more easily recruit, communicate, and operate across borders. It is correspondingly much more difficult to contain an insurgency in a region. Global media has led to development of new tactics, in particular new types of terrorism, designed to capture worldwide attention. Compared with what was available in the 1960s, there are orders of magnitude more academic research available relevant to this study's topics. We were able to draw on more recent work in psychology, political science, economics, sociology, organizational studies, and communications studies. Readers of this edition will, over the course of eleven chapters, get a wide exposure to basic concepts from a number of disciplines".

Design, Make, Play Margaret Honey 2013-03-12 Design, Make, Play: Growing the Next Generation of STEM Innovators is a resource for practitioners, policymakers, researchers and program developers that illuminates creative, cutting edge ways to inspire and motivate young people about science and technology learning. The book is aligned with the National Research Council's new Framework for Science Education, which includes an explicit focus on engineering and design content, as well as integration across disciplines. Extensive case studies explore real world examples of innovative programs that take place in a variety of settings, including schools, museums, community centers, and virtual spaces. Design, Make, and Play are presented as learning methodologies that have the power to rekindle children's intrinsic motivation and innate curiosity about STEM (science, technology, engineering, and mathematics) fields. A digital companion app showcases rich multimedia that brings the stories and successes of each program—and the students who learn there—to life.

Total Factor Productivity Growth in Historical Perspective Robert Shackleton 2013-04-20 Over the past century or more, gains in total factor productivity (TFP) have accounted for well over half the growth in measured U.S. labor productivity (output per hour of work) -- that is, they have contributed more to the measured growth of labor productivity than has growth in the amount of capital per worker -- and they are likely to be critical for future economic growth as well. This study reviews the broad contours of TFP growth in the U.S. economy since 1870, highlighting the contribution of various technological innovations to the growth of different sectors of the economy. It also notes the correlation between TFP growth and improvements in general health and well-being as reflected in changes in life expectancy. Finally, the study discusses the potential for continued growth in TFP in the future. Tables and figures. This is a print on demand report.

The Subtle Art of Not Giving a F\*\*k Mark Manson 2016-09-13 #1 New York Times Bestseller Over 10 million copies sold In this generation-defining self-help guide, a superstar blogger cuts through the crap to show us how to stop trying to be "positive" all the time so that we can truly become better, happier people. For decades, we've been told that positive thinking is the key to a happy, rich life. "F\*\*k positivity," Mark Manson says. "Let's be honest, shit is f\*\*ked and we have to live with it." In his wildly popular Internet blog, Manson doesn't sugarcoat or equivocate. He tells it like it is—a dose of raw, refreshing, honest truth that is sorely lacking today. The Subtle Art of Not Giving a F\*\*k is his antidote to the coddling, let's-all-feel-good mindset that has infected American society and spoiled a generation, rewarding them with gold medals just for showing up. Manson makes the argument, backed both by academic research and well-timed poop jokes, that improving our lives hinges not on our ability to turn lemons into lemonade, but on learning to stomach lemons better. Human beings are flawed and limited—"not everybody can be extraordinary, there are winners and losers in society, and some of it is not fair or your fault." Manson advises us to get to know our limitations and accept them. Once we embrace our fears, faults, and uncertainties, once we stop running and avoiding and start confronting painful truths, we can begin to find the courage, perseverance, honesty, responsibility, curiosity, and forgiveness we seek. There are only so many things we can give a f\*\*k about so we need to figure out which ones really matter, Manson makes clear. While money is nice, caring about what you do with your life is better, because true wealth is about experience. A much-needed grab-you-by-the-shoulders-and-look-you-in-the-eye moment of real-talk, filled with entertaining stories and profane, ruthless humor, The Subtle Art of Not Giving a F\*\*k is a refreshing slap for a generation to help them lead contented, grounded lives.

Teaching Shakespeare and Marlowe Liam E. Semler 2013-12-19 Schools and universities are fast becoming managerial 'courts' of learning in which educators and students are system creatures busily fulfilling system protocols. Any teacher or academic yearning for fresh and authentic approaches to their discipline must first find ways to imagine possibilities beyond the system's limits. This book sounds the depths of the problem in respect to Literary Studies and proposes strategies for effecting voluntary 'exile' from court in pursuit of more imaginative approaches to the teaching and learning of Shakespeare and Marlowe.

Previous Papers for the purpose of practice of questions based on the latest pattern of the examination. Detailed Explanatory Answers have also been provided for the selected questions for Better Understanding of the Candidates Culture and Economy in the Age of Social Media Christian Fuchs 2015-01-09 Understanding social media requires us to engage with the individual and collective meanings that diverse stakeholders and participants give to platforms. It also requires us to analyse how social media companies try to make profits, how and which labour creates this profit, who creates social media ideologies, and the conditions under which such ideologies emerge. In short, understanding social media means coming to grips with the relationship between culture and the economy. In this thorough study, Christian Fuchs, one of the leading analysts of the Internet and social media, delves deeply into the subject by applying the approach of cultural materialism to social media, offering readers theoretical concepts, contemporary examples, and proposed opportunities for political intervention. Culture and Economy in the Age of Social Media is the ultimate resource for anyone who wants to understand culture and the economy in an era populated by social media platforms such as Twitter, Facebook, and Google in the West and Weibo, Renren, and Baidu in the East. Updating the analysis of thinkers such as Raymond Williams, Karl Marx, Ferruccio Rossi-Landi, and Dallas W. Smythe for the 21st century, Fuchs presents a version of Marxist cultural theory and cultural materialism that allows us to critically understand social media's influence on culture and the economy.
