Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of The Man Who Mistook His Wife for a Hat What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

All That Trash Meghan McCarthy 2018-02-27 "The year was 1987 and a ship full of trash was about to become famous...The narrative is immensely readable...A fresh take on a story of old garbage guaranteed to spark conversations and a desire for actions among students. Highly recommended." —School Library Journal (starred review) A garbage barge that can't find a place to welcome it sparks a recycling movement in the United States in this smart and smelly picture book from the author of Earmuffs for Everyone. Lowell Harrelson wanted to turn trash into methane gas so he rented a barge called Morbo 4000. His plan was to ship the garbage from New York to North Carolina, but as the barge floated down the coast, no state would let him dock because of smelly waste on board! The barge became a mockery and the butt of many jokes in the media. What started as an attempted business venture turned into quite the predicament for Mr. Harrelson. Mobro 4000 roamed the seas for forty-five days and traveled a distance of 6,000 miles. While awaiting its fate, the trash floated in New York's harbor, garnering much attention by onlookers. Green Peace activists put up a large banner across the barge that read, "NEXT TIME...TRY RECYCLING." Even though the garbage barge was a farce, the unintended consequence inspired America to find a new way to deal with its trash.
