Grading the Nation's Report Card Committee on the Evaluation of National and State Assessments of Educational Progress 1999-01-06 Since the late 1960s, the National Assessment of Educational Progress (NAEP)--the nation's report card--has been the only continuing measure of student achievement in key subject areas. Increasingly, educators and policymakers have expected NAEP to serve as a lever for education reform and many other purposes beyond its original role. Grading the Nation's Report Card examines ways NAEP can be strengthened to provide more informative portrayals of student achievement and the school and system factors that influence it. The committee offers specific recommendations and strategies for improving NAEP's effectiveness and utility, including: Linking achievement data to other education indicators. Streamlining data collection and other aspects of its design. Including students with disabilities and English-language learners. Revamping the

process by which achievement levels are set. The book explores how to improve NAEP framework documents--which identify knowledge and skills to be assessed--with a clearer eye toward the inferences that will be drawn from the results. What should the nation expect from NAEP? What should NAEP do to meet these expectations? This book provides a blueprint for a new paradigm, important to education policymakers, professors, and students, as well as school administrators and teachers, and education advocates.

African Multilingualisms Pierpaolo Di Carlo 2020-01-15 Although multilingualism is the norm in the day-to-day lives of most sub-Saharan Africans, multilingualism in settings outside of cities has so far been under-explored. This gap is striking when considering that in many parts of Africa, individual multilingualism was widespread long before the colonial period and centuries before the continent experienced large-scale urbanization. The edited collection African Multilingualisms fills this gap by presenting results from recent and ongoing research based on fieldwork in rural African environments as well as environments characterized by contact between urban and rural communities of speakers. The contributors—mostly Africans themselves, including a number of emerging scholars—present findings that both complement and critique current scholarship on African multilingualism. In addition, new methods and tools are introduced for the study of multilingualism in rural settings, alongside illustrations of the kinds of results that they yield. African Multilingualisms reveals an impressive diversity in the features of local language ideologies, multilingual behaviors, and the relationship between language and identity.

Introductory Statistics Barbara Illowsky 2017-12-19 Introductory Statistics is designed for the one-semester, introduction to statistics course and is geared toward students majoring in fields other than math or engineering. This text assumes students have been exposed to intermediate algebra, and it focuses on the

applications of statistical knowledge rather than the theory behind it. The foundation of this textbook is Collaborative Statistics, by Barbara Illowsky and Susan Dean. Additional topics, examples, and ample opportunities for practice have been added to each chapter. The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in teaching this course. These choices led to innovations in art, terminology, and practical applications, all with a goal of increasing relevance and accessibility for students. We strove to make the discipline meaningful, so that students can draw from it a working knowledge that will enrich their future studies and help them make sense of the world around them. Bringing Literacy to Life Heide Spruck Wrigley 1992 The result of a 2-year research study funded under the National English Literacy Demonstration Program for Adults of Limited English Proficiency, this handbook on adult English-as-a-Second-Language (ESL) literacy education represents a synthesis of ideas derived from various sources. It is meant as a resource for teachers who have some experience in teaching but are new to ESL literacy. It contains the following nine chapters: (1) "Adult ESL Literacy: State of the Art," which discusses some of the special features of adult ESL literacy; (2) "Approaches and Materials," which maintains that meaning-based approaches show the greatest promise in helping adults develop full literacy; (3) "Teaching Adult ESL Literacy in the Multilevel Classroom," which shows that group work is the most effective strategy for dealing with multilevel classrooms; (4) "Using Computer and Video Technology in Adult ESL Literacy," which discusses the pros and cons of using technology in ESL literacy teaching; (5) "Native Language Literacy," which demonstrates that using the native language of the learners is a viable approach to introducing literacy to adults who are not literate in their first language; (6) "Learner Assessment," which shows that program-based assessments are superior to standardized tests; (7) "Curriculum," which demonstrates that curriculum decisions are value decisions that mirror a program's philosophy; (8) "Staff Development and Program Issues," which holds that effective staff development should focus on the social context, adult learning, second language acquisition, literacy development, and effective teaching processes; and (9) "Curriculum Modules," which presents 10 teaching units that demonstrate meaning-based teaching. Norms of Word Association Leo Postman 2014-05-10 Norms of Word Association contains a heterogeneous collection of word association norms. This book brings together nine sets of association norms that were collected independently at different times during a 15-year period. Each chapter is a self-contained unit. The order in which the norms are presented is arbitrary, although an attempt is made to group together norms that seem to belong together. The 1952 Minnesota norms are presented first, due to "age" and in recognition of the fact that a number of the norms that follow are direct outgrowths of this work. The next three norms in this collection are responses to the Russell-Jenkins stimuli obtained from subjects representing different linguistic communities. A summary of association norms collected from British and Australian subjects are reported along with association norms from German and French college students and French workmen. Four sets of norms that are not directly related to the 1952 Minnesota collection are included. The text will be of interest to historians and researchers in the field of verbal learning and verbal behavior.

K-BIT 2 Alan S. Kaufman 2004 A standardized, individually

The Elements of Input-output Analysis William H. Miernyk 1965  
Performance Assessments for Adult Education National

Research Council 2002-08-01 In the United States, the nomenclature of adult education includes adult literacy, adult secondary education, and English for speakers of other languages (ESOL) services provided to undereducated and limited English proficient adults. Those receiving adult education services have diverse reasons for seeking additional education. With the passage of the WIA, the assessment of adult education students became mandatory-regardless of their reasons for seeking services. The law does allow the states and local programs flexibility in selecting the most appropriate assessment for the student. The purpose of the NRC's workshop was to explore issues related to efforts to measure learning gains in adult basic education programs, with a focus on performance-based assessments.

Educating One and All National Research Council 1997-06-27 In the movement toward standards-based education, an important question stands out: How will this reform affect the 10% of school-aged children who have disabilities and thus qualify for special education? In *Educating One and All*, an expert committee addresses how to reconcile common learning for all students with individualized education for "one"â€"the unique student. The book makes recommendations to states and communities that have adopted standards-based reform and that seek policies and practices to make reform consistent with the requirements of special education. The committee explores the ideas, implementation issues, and legislative initiatives behind the tradition of special education for people with disabilities. It investigates the policy and practice implications of the current reform movement toward high educational standards for all students. *Educating One and All* examines the curricula and expected outcomes of standards-based education and the educational experience of students with disabilitiesâ€"and identifies points of alignment between the two areas. The volume documents the diverse population of students with disabilities and their school experiences. Because approaches to assessment and accountability are key to standards-based reforms, the committee analyzes how assessment systems currently address students with disabilities, including testing accommodations. The book addresses legal and resource implications, as well as parental participation in children's education.

Adult Literacy in America Irwin S. Kisch 1994 Offers an overview of the results of the National Adult Literacy Survey. Describes

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application.

Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration.

Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

English as a Second Language 1992 In response to state

legislation and a statewide strategic plan that included a

recommendation for quality standards and accountability defined

as measurable goals and conditions, model standards for

California English-as-a-Second-Language (ESL) adult education programs were established. This document describes general standards, defines language proficiency level, and identifies possible tests for measuring the language proficiency of adults in the California ESL programs. The language proficiency levels are sequenced from ESL beginning literacy through advanced-high. The descriptions included in the ESL model standards reflect current thinking about developmental stages in second-language acquisition and the nature of communicative competence. They distinguish different levels of language proficiency based on content, language functions, and language forms as well as listening, speaking, reading, and writing skills. The contents of this guide are as follows: (1) general standards (program, curricular, instructional, and standards for student evaluation); (2) levels of language proficiency (descriptions of proficiency levels, descriptions of course content, and sample lessons); and (3) ESL testing (general standards, testing materials, selected references). Appended are additional information on levels of language proficiency, general nature of instruction by ESL proficiency level, language skills objectives by ESL proficiency level, language functions by ESL proficiency level, and language forms by ESL proficiency level. Mindset Mathematics Jo Boaler 2017-08-28 Engage students in mathematics using growth mindset techniques The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts. In this volume, you'll find a collection of low floor, high ceiling tasks that will help you do just that, by looking at the big ideas at the first-grade level through visualization, play, and investigation. During their work with tens of thousands of teachers, authors Jo Boaler, Jen Munson, and Cathy Williams heard the same message—that they want to incorporate more brain science into their math instruction, but they need guidance in the techniques that work best to get

across the concepts they needed to teach. So the authors designed Mindset Mathematics around the principle of active student engagement, with tasks that reflect the latest brain science on learning. Open, creative, and visual math tasks have been shown to improve student test scores, and more importantly change their relationship with mathematics and start believing in their own potential. The tasks in Mindset Mathematics reflect the lessons from brain science that: There is no such thing as a math person - anyone can learn mathematics to high levels. Mistakes, struggle and challenge are the most important times for brain growth. Speed is unimportant in mathematics. Mathematics is a visual and beautiful subject, and our brains want to think visually about mathematics. With engaging questions, open-ended tasks, and four-color visuals that will help kids get excited about mathematics, Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards (CCSS) and can be used with any current curriculum.
