Kasserine Pass 1943 Steven J. Zaloga 2013-01-20 The North African campaign of November 1942-May 1943 was a baptism of fire for the US Army. After relatively straightforward landings, the US II Corps advanced into Tunisia to support operations by the British 8th Army. Rommel, worried by the prospect of an attack, decided to exploit the inexperience of the US Army and strike a blow against their overextended positions around the Kasserine Pass. However, the Germans were unable to exploit their initial success, and later attacks were bloodily repused. The fighting in Tunisia taught the green US Army vital combat lessons, and brought to the fore senior commanders such as Eisenhower, Patton, and Bradley.

Fallstudien zur Betriebswirtschaftslehre - Band 7 Marco Becker 2018-11-02 Das Lernen anhand von Fallstudien hat in der Ausbildung von Studierenden mittlerweile eine lange Tradition. Es wurde ursprünglich an der Harvard Law School entwickelt. Gegen Ende des 19. Jahrhunderts wurde erkannt, dass der Unterrichtsstoff anhand von praxisorientierten Fallstudien viel anschaulicher vermittelt werden kann, als mit Hilfe herkömmlicher Lernmaterialien. Bereits zu Beginn des 20. Jahrhunderts wurden Fallstudien an der Harvard Business School in der betriebswirtschaftlichen Ausbildung von Studierenden eingesetzt. CTR-Business-Cases stellen eine Weiterentwicklung dieser Methode dar, wobei die Abkürzung CTR für „Compact Teaching Reality“, also übersetzt „komprimierte Lernumgebung“ steht. Als Bearbeiter schlüpfen Sie in die Rolle eines Managers oder Unternehmensberaters und erarbeiten einen strukturierten Lösungsansatz für die in der CTR-Fallstudie aufgeworfenen Probleme. Im Rahmen der Bearbeitung von CTR-Business- Cases soll zum einen die wahre Ursache der identifizierten Probleme herausgearbeitet und zum anderen wirksame Lösungsansätze entwickelt werden. Alle CTR-Business-Cases basieren auf realen Fällen. Zum Schutz des jeweiligen Unternehmens werden alle Angaben zum Unternehmen verfremdet und die handelnden Personen vollständig anonymisiert. So sind auch alle Dialoge etc. frei erfunden.

Captain Cook Oliver Warner 2016-08-29 In his three extraordinary voyages, Captain James Cook made history. He was the first to discover Australia and the Hawaiian Islands and the first to circumnavigate New Zealand. By the 1700s, England, eager to expand its realm of trade, promoted exploration of all the unclaimed regions of the world. The eighteenth century, the age of reason and enlightenment, required a new kind of explorer: not a rover or a plunderer or a seeker of adventure for its own sake, but a master of navigation and seamanship. Captain James Cook filled the bill. No one ever surpassed Cook's record. From South America to Australia, from the ice islands of the South Pacific to the fogbound Bering Strait, lay thousands of miles of islands, atolls, and ocean that Cook charted.

Clusters Old and New Queen's University (Kingston, Ont.). School of Policy Studies 2003 In recent years there has been a virtual explosion of interest in cluster development across North America, Europe, and newly industrialized countries. This interest has been prompted by fascination with the success of Silicon Valley at reinventing itself through successive waves of technology innovation and claims by a growing number of imitators to have replicated the conditions for its success. A growing number of clusters around the globe, from Scotland to Bangalore and from Singapore to Israel, all claim direct lineage to the original model in northern California. Clusters Old and New presents the initial results of a study into the formation and growth of industry clusters across Canada.Contributors investigate the process of cluster development in a wide range of locales, in knowledge-intensive sectors as well as more traditional ones, and in both metropolitan and non-metropolitan settings. The authors suggest that the process of cluster formation is complex and may extend over decades. While public policy plays a critical role in supporting the establishment and growth of clusters, the range of factors that contribute to their success is quite varied. The authors provide a basis for beginning to understand the process of cluster formation from an evolutionary perspective, as well as some criteria for determining the presence or absence of true cluster dynamics in the cases under investigation.
