AC High Voltage Circuit Breakers - IEEE

step-up transformer. They are generally used with generators of high power (100MVA to 1800 MVA) in order to protect them safely, rapidly and in an economical way. They must be able to carry high continuous currents (6300 A to 40000 A), and they must have a high short-circuit breaking current capability (63 kA to 275 kA). HV Circuit Breaker - Type
