Smart Cities and Smart Spaces: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources 2018-09-07 As populations have continued to grow and expand, many people have made their homes in cities around the globe. With this increase in city living, it is becoming vital to create intelligent urban environments that efficiently support this growth and simultaneously provide friendly and progressive environments to both businesses and citizens alike. Smart Cities and Smart Spaces: Concepts, Methodologies, Tools, and Applications is an innovative reference source that discusses social, economic, and environmental issues surrounding the evolution of smart cities. Highlighting a range of topics such as smart destinations, urban planning, and intelligent communities, this multi-volume book is designed for engineers, architects, facility managers, policymakers, academicians, and researchers interested in expanding their knowledge on the emerging trends and topics involving smart cities.

Local Government and the COVID-19 Pandemic Carlos Nunes Silva

Reconsidering Welfare Policies in Times of Crisis Ombretta Caldarice 2017-11-24 This book offers a European perspective on spatial planning and welfare policies in relation to the new conditions derived from the current urban crisis. The book deals with research and policy issues stemming from the fact that in the last ten years European cities have been affected by a structural crisis, not only financial but also a social, environmental and spatial, leading to an economic collapse. The crisis and its consequences due to political, financial and social conflicts contribute to increasing a city's complexity in terms of decrease of public finance, slowdowns in the real estate market, economic stagnation and the reduction of the consolidated welfare policies. In light of this, this book proposes to reframe European urban welfare towards a "framework-rule" perspective. It is based on new rules and responsibilities as a path to change that would enable cities to respond to new circumstances through innovative actions thanks to co-production. The book focuses on the potential of this approach, identifying innovative perspectives for researchers, institutions and practitioners in the field of urban and regional planning. It also addresses the growth of civic initiatives all over Europe in which citizens and private business are engaged for the self-delivery of urban facilities, while jointly identifying issues and needs, and trying to solve problems with innovative and inclusive responses. This book will appeal to students and researchers along with a

professional and policy audience due to the topical nature of the contents.

Big Data Science and Analytics for Smart Sustainable Urbanism Simon Elias Bibri 2019-05-30 We are living at the dawn of what has been termed 'the fourth paradigm of science,' a scientific revolution that is marked by both the emergence of big data science and analytics, and by the increasing adoption of the underlying technologies in scientific and scholarly research practices. Everything about science development or knowledge production is fundamentally changing thanks to the ever-increasing deluge of data. This is the primary fuel of the new age, which powerful computational processes or analytics algorithms are using to generate valuable knowledge for enhanced decision-making, and deep insights pertaining to a wide variety of practical uses and applications. This book addresses the complex interplay of the scientific, technological, and social dimensions of the city, and what it entails in terms of the systemic implications for smart sustainable urbanism. In concrete terms, it explores the interdisciplinary and transdisciplinary field of smart sustainable urbanism and the unprecedented paradigmatic shifts and practical advances it is undergoing in light of big data science and analytics. This new era of science and technology embodies an unprecedentedly transformative and constitutive power—manifested not only in the form of revolutionizing science and transforming knowledge, but also in advancing social practices, producing new discourses, catalyzing major shifts, and fostering societal transitions. Of particular relevance, it is instigating a massive change in the way both smart cities and sustainable cities are studied and understood, and in how they are planned, designed, operated, managed, and governed in the face of urbanization. This relates to what has been dubbed data-driven smart sustainable urbanism, an emerging approach based on a computational understanding of city systems and processes that reduces urban life to logical and algorithmic rules and procedures, while also harnessing urban big data to provide a more holistic and integrated view or synoptic intelligence of the city. This is increasingly being directed towards improving, advancing, and maintaining the contribution of both sustainable cities and smart cities to the goals of sustainable development. This timely and multifaceted book is aimed at a broad readership. As such, it will appeal to urban scientists, data scientists, urbanists, planners, engineers, designers, policymakers, philosophers of science, and futurists, as well as all readers interested in an overview of the pivotal role of big data science and analytics in advancing every academic discipline and social practice concerned with data-intensive science and its application, particularly in relation to sustainability.

Planning in Taiwan Roger Bristow 2010-05-04 As a newly industrialised country with highly successful economic growth and political liberation in a short period of time, Taiwan has been viewed as a model for other aspiring countries and regions. This volume focuses on the connection between planning institution and practice and the country's future in terms of political institutions and economic and environmental sustainability. The book starts by providing a history of planning in Taiwan and situates contemporary Taiwanese planning in the wider global context. The contributors go on to cover challenges to planning, urban change, legal planning, land problems, the development of industrial land, community planning, conservation, ecological land use, planning for natural disasters and transportation planning. The conclusion discusses the challenges for Taiwan in the twenty-first century. Planning in Taiwan will be of interest to students and academics working on comparative planning, development and politics, urban studies and conservation.

City, Space and Politics in the Global South Bikramaditya K. Choudhary 2020-04-03 Cities are centres of exciting events, flows, movements and contradictions that produce both opportunities and challenges. Evolved through the centuries, they display layers of spatial, cultural and socio-economic diversity and contestations, which are articulated in multiple ways. It is in this backdrop that the present volume addresses some of the myriad issues visible in the contemporary cities of the Global South. The volume is divided into three parts, each of them focusing on different dimension of contemporary urban challenges. Part I entitled 'The Concept of a City' contains five papers dealing with conceptual complexities of the urban. This part analyses as to what extent

development intrudes on urban space and space in turn influences development. Part II 'City and Urban Space' contains six papers. These focus on the existing patterns, processes, and perspectives of urbanization and its consequent everyday manifestations across different cities. Part III 'Urban Policy, Planning and Governance' has six papers dealing with policy and planning. In the wake of rapid urbanization and economic growth, the urban sector is swiftly changing towards being economic engines. Cities and towns being the centres of economic activities play a catalytic role in contributing to economic development and poverty reduction. However, there are layers of challenges that these cities face. This timely volume brings out these challenges and also analyses plausible solutions which can be brought about by the efficient and effective provision of essential urban services and infrastructure. Please note: This title is co-published with Manohar Publishers, New Delhi. Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

UPAT – Urban Planning Advisory Team Bernd Scholl 2015-10-07 As part of the ISOCARP 50th anniversary programme, the publication of Ten Years of UPATs: Reflections and Results is certainly one of the "flagship" activities of ISOCARP. We have to thank the editors and authors, as well as all the members of the Urban Planning Advisory Teams who contributed to the impressive quality of this publication. The initiation of the UPATs was a turning point in the activities of ISOCARP as a professional organisation. Instead of limiting its role to reflecting on activities, it turned into a pro-active organisation intervening in the real world, rather than serving only as a consultant. The UPATs try to "open eyes and doors", to think and act in other directions, and start collaborative and innovative planning processes rolling. At the same time, the UPATs created the opportunity to bring ISOCARP members together: new planners and experienced planners with widely divergent backgrounds and their own specific areas of expertise. Unexpectedly, the UPATs created a kind of "cement" among its members and gave ISOCARP a new active face. The publication is clearly structured, complete and much more than a pure report. It contains an elaboration of the objectives of the UPAT concept, an interesting explanation and justification of the planning methodology and maxims, a brief comparative analysis of similar expert advisory platforms applying collaborative planning procedures, and a general description with the categories and characteristics of all the UPATs. The core of the book is devoted to the description of case studies, the organisation and management of the workshops, and, ultimately, to an elucidation of the lessons learned. When we think about the role of ISOCARP in the future, we should take the UPATs as an example for the way a modern professional organisation can act, not only through knowledge sharing, but also by developing visions, concepts and concrete solutions for complex urban problems within a collaborative setting.

Changing Course Asian Development Bank 2009-10-01 Most Asian cities have grown more congested, more sprawling, and less livable in recent years; and statistics suggest that this trend will continue. Rather than mitigate the problems, transport policies have often exacerbated them. In this book, the Asian Development Bank outlines a new paradigm for sustainable urban transport that gives Asian cities a workable, step-by-step blueprint for reversing the trend and moving toward safer, cleaner, more sustainable cities, and a better quality of urban life.

OECD Public Governance Reviews Estonia: Towards a Single Government Approach OECD 2011-08-04 This review looks at how, building on its significant accomplishments to date, the Estonian public administration can work together as a single government to improve and sustain service delivery to citizens and to meet new challenges on the horizon.

Dialogues in Urban and Regional Planning Thomas Harper 2008-06-30 This is the third book in the series offering a new selection of the best urban planning scholarship from each of the world's planning school associations. The award winning papers presented illustrate the concerns and the discourse of planning scholarship communities and provide a glimpse into planning theory and practice by planning academics around the world. All those with an interest in urban and regional planning will find this collection valuable in opening new avenues for research and debate.

Handbook of Research on Sustainable Development and Governance Strategies for Economic Growth in Africa

Teshager Alemu, Kassa 2018-02-09 Despite increasing reports across the globe on renewable development and maintenance, little is known regarding what strategies are required for improved economic growth and prosperity in Africa. Improving an understanding of the methods for promoting growth through reusable resource development and administration is a vital topic of research to consider in assisting the continent's development. The Handbook of Research on Sustainable Development and Governance Strategies for Economic Growth in Africa provides emerging research on the strategies required to promote growth in Africa as well as the implications and issues of the expansion of prosperity. While highlighting sustainable education, pastoral development pathways, and the public-sector role, readers will learn about the history of sustainable development and governmental approaches to improving Africa's economy. This publication is a vital resource for policy makers, research institutions, academics, researchers, and advanced-level students seeking current research on the theories and applications of development in societal and legal institutions.

The Governance of Land Use in Korea Urban Regeneration OECD 2019-11-04 This report examines land-use trends, policies and practices in Korea, in particular in the city of Busan, through the lens of urban regeneration and citizen participation. Land-use planning is critical for the efficient and inclusive management of cities, pursuing sustainable and balanced development and improving quality of life and regional competitiveness.

Sustainable Cities Simon Joss 2017-08-24 Interest in the sustainable city is growing around the world and with it come important questions about governing sustainable urban development. Why are there blockages to achieving the goal of a sustainable city? How is it possible to overcome the practical difficulties that initiatives often face? And how can an increasingly technocratic focus be rebalanced with more of a public perspective? In this wide-ranging text, Simon Joss examines mainstream policy and practice and looks at the approaches that can overcome some of their drawbacks. The author examines the core elements of sustainable planning, and how processes of innovation, governance and policy-making work together to achieve sustainable urban change. He assesses the various challenges faced at both the domestic and international level, and across a range of urban scales. These challenges include how to resolve environmentally problematic ways of city-living at the same time as providing for urban social and economic development, and how to adapt the idea and reality of the sustainable city to different geopolitical contexts. The author recognizes that there is no 'one-size-fits-all' solution and examines the range of methods available. In an era where entirely new eco-cities are being built and established ones being retro-fitted in response to environmental pressures, this text looks at the varying successes of the urban sustainability movement and its relationship to the planners, policy-makers and citizens who are inseparable from it. Providing an accessible account of the latest developments in research and policy as well as examples from around the world, this is indispensable reading for students, researchers and practitioners alike.

A New Paradigm for International Business Hadrian Geri Djajadikerta 2015-07-01 This book offers a collection of studies on regional integration and the dynamic business environment in East Asia. The papers included, originally presented at the 2014 Asia Pacific Business Conference on "Free Trade Agreements and Regional Integration in East Asia," examine the challenges and dynamics in the increasingly integrated East Asian markets and outline a new paradigm for doing international business in the region. The papers address diverse areas related to regional integration, financial markets, investment, trade and capital flow, sustainability, accounting and auditing issues, exchange rates, strategies and the regional business environment. The book provides a valuable resource for practitioners, policy-makers and students who are interested in understanding the vibrant aspects of business in today's East Asia.

Assorted City Suptendu P. Biswas 2015-08-19 A rare piece of research on the game of urban services delivery in an Indian metropolis. Assorted City makes an important contribution to urban planning discourses in India by offering an in-depth conceptual and theoretical insight to address theory-practice dichotomy. A unique work on urban services delivery in an Indian city, it narrates

how equity and justice are manipulated in the process. It captures generic urban processes in three ways: the questions it raises about planning, the multifaceted methodological perspective it introduces, and the commitment it underlines toward social justice and equity in a democracy. This book explores and exposes the interplay between urban existence and the politics of service delivery.

Urban Planning and Real Estate Development John Ratcliffe 2021-07-29 This fourth edition of Urban Planning and Real Estate Development guides readers through the procedural and practical aspects of developing land from the point of view of both planner and developer. The twin processes of planning and property development are inextricably linked – it is not possible to carry out a development strategy without an understanding of the planning process, and, equally, planners need to know how real estate developers do their job. The planning system is explained, from the increasing emphasis on spatial planning at a national, local, and neighbourhood level down to the detailed perspective of the development management process and the specialist requirements of historic buildings and conservation areas. At the same time, the authors explain the entire development process from inception, through appraisal, valuation, and financing, to completion. Sustainability and corporate social responsibility and their impact on planning and development are covered in detail, and the future consequences of the COVID-19 pandemic are explored in new opening and closing chapters setting the text in a global context. Written by a team of authors with many years of academic, professional, and research experience, and illustrated throughout with practical case studies and follow-up resources, this book is an invaluable textbook for real estate and planning students and helps to meet the requirements of the RICS and RTPI Assessment of Professional Competence.

Emerging New Paradigms Transit Cooperative Research Program 2003 Describes how public transportation organizations have entered an era of fundamental change and examines how they are responding to dramatic new expectations and imperatives that have triggered the emergence of a "new paradigm" throughout business and industry worldwide.

New Urban Agenda in Asia-Pacific Bharat Dahiya 2019-05-04 This book explores significant aspects of the New Urban Agenda in the Asia-Pacific region, and presents, from different contexts and perspectives, innovative interventions afoot for transforming the governance of 21st-century cities in two key areas: (i) urban planning and policy; and (ii) service delivery and social inclusion. Representing institutions across a wide geography, academic researchers and development practitioners from Asia, Australia, Europe, and North America have authored the chapters that lend the volume its distinctly diverse topical foci. Based on a wide range of cases and intriguing experiences, this collection is a uniquely valuable resource for everyone interested in the present and future of cities and urban regions in Asia-Pacific.

Resilience and Southern Urbanism Binti Singh 2022-01-10 This volume studies the urbanisation trends of medium-sized cities of India to develop a typology of urban resilience. It looks at historic second-tier cities like Nashik, Bhopal, Kolkata and Agra, which are laboratories of smart experiments and are subject to technological ubiquity, with rampant deployment of smart technologies and dashboard governance. The book examines the traditional values and systems of these cities that have proven to be resilient and studies how they can be adapted to contemporary times. It also highlights the vulnerabilities posed by current urban development models in these cities and presents best practices that could provide leads to address impending climate risks. The book also offers a unique Resilience Index that can drive change in the way cities are imagined and administered, customised to specific needs at various scales of application. Part of the Urban Futures series, the volume is an important contribution to the growing scholarship of southern urbanism and will be of interest to researchers and students of urban studies, urban ecology, urban sociology, architecture, geography, urban design,

anthropology, cultural studies, environment, sustainability, urban planning and climate change. Mobile Computing and Wireless Networks: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources 2015-09-30 We live in a wireless society, one where convenience and accessibility determine the efficacy of the latest electronic gadgets and mobile devices. Making the most of these technologies—and ensuring their security against potential attackers—requires increased diligence in mobile technology research and development. Mobile Computing and Wireless Networks: Concepts, Methodologies, Tools, and Applications brings together a comprehensive range of voices and research in the area of mobile and wireless technologies, exploring the successes and failures, advantages and drawbacks, and benefits and limitations of the technology. With applications in a plethora of different research and topic areas, this multi-volume reference work benefits researchers, service providers, end-users, and information technology professionals. This four-volume reference work includes a diverse array of chapters and authors covering topics such as m-commerce, network ethics, mobile agent systems, mobile learning, communications infrastructure, and applications in fields such as business, healthcare, government, tourism, and more.

Globalization and Development Studies Professor Frans J Schuurman 2001-11-02 As a whole, the book is a useful compilation of rigorous academics papers. The contributions by the editor have woven these into an organic whole, rather than being a conglomerate of uncorrelated works on a common theme' "- K B S Sidhu, *The Tribune* " This text provides a comprehensive introduction to the concept of globalization and its challenge to the contemporary study of development. Part I introduces the theoretical issues and debates surrounding globalization, illustrates the often contested nature of the concept, and considers the implications for the future of development studies. Part II reviews more specific theory and policy implications by assessing the impact of globalization to a number of key areas of study in development studies. These include the environment, gender, human rights, multinationals, and urban development. An essential underlying theme to the book is whether a seeming transition from development studies to global studies is offering anything new and fruitful for our future understanding and study of development.

E-Planning and Collaboration: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources 2018-06-04 As population growth accelerates, researchers and professionals face challenges as they attempt to plan for the future. E-planning is a significant component in addressing the key concerns as the world population moves towards urban environments. E-Planning and Collaboration: Concepts, Methodologies, Tools, and Applications contains a compendium of the latest academic material on the emerging interdisciplinary areas of e-planning and collaboration. Including innovative studies on data management, urban development, and crowdsourcing, this multi-volume book is an ideal source for planners, policymakers, researchers, and graduate students interested in how recent technological advancements are enhancing the traditional practices in e-planning.

Emerging Paradigms in Urban Mobility Om Prakash Agarwal 2018-08-30 Emerging Paradigms in Urban Mobility: Planning, Finance and Implementation explains the types of new urban mobility planning paradigms that are emerging throughout the world, along with their potential to transform the transportation landscape. As half of the world's 7 billion people now live in cities, thus causing severe road congestion, increased air pollution, energy insecurity and sustainability problems in cities and the planet itself, this book presents new paradigms that are emerging to address these problems, along with other topics of note, including economic efficiency, health, the well-being of cities and their residents, urban mobility transformations, and the role of social media. In addition, the book looks at Integrated Corridor Management and how it improves the people-moving performance of multi-modal transport systems in high demand urban corridors and how countries balance the mobility benefits of motorcycles with the environmental and safety threats they pose. Provides previously unpublished research on new approaches to integrating governance, the changing role of IT, and shared mobility initiatives Links transportation and land use, climate change, and poverty reduction and gender, going well beyond the technical issues of transport

planning Highlights successful factors that have worked and how they can be tailored to different contexts Includes learning aids, such as case studies, text boxes and chapter openers and summaries

Collaborative Governance: A New Paradigm Shift Gedifew Yigzaw 2020-11-25 Literature Review from the year 2020 in the subject Politics - International Politics - Topic: Miscellaneous, Bahir Dar University, language: English, abstract: In this 21st century, collaborative governance has got great attention to resolve socio-economic problems and assure sustainable development goals. It is a new form of governance in which multi-stakeholders, such as the public agencies, private sectors, civil society organizations and international public organizations are working together build trust in government, resolve societal challenges, assure economic prosperity and development, and bring institutional transformation. This book chapter has tried to describe the theoretical and conceptual perspectives of collaborative governance. As it has described in this volume, the author believed that giving some insights on the collaborative governance; conceptual understanding, its nexus with development, and measurement parameters for checking its effectiveness, could produce a theoretical and conceptual asset for the other authors who want to make an in-depth investigation on the areas of governance.

Urban Governance and Democracy Michael Haus 2004-09-09 The issue of local governance is high on the institutional agenda of many local and regional authorities throughout the OECD countries. This book explores the relationship between two key issues of urban governance - leadership and community involvement - and how making these two elements more complementary can lead to more effective as well as legitimate policy outcomes. The authors examine the dilemmas involved in ensuring effective governance, focusing on issues such as legitimacy, citizen participation, economic performance and social inclusion.

Sustainable and Smart Spatial Planning in Africa Charles Chavunduka 2022-04-25 This book clarifies the smart city concept that is gaining application in Sub – Saharan Africa. It shows how the smart concept can be used to address problems that would be difficult and more expensive to solve using traditional techniques such as employment creation. This is done through elaboration of the African interpretation of smartness, using tools for smart solid waste management, e-governance, smart energy, and smart infrastructure. The case studies selected, and each chapter explain a different dimension of the smart city concept and offer innovative solutions to problems of rapid urbanization. It lays the theoretical foundation for further research on smart cities and rural areas in Africa.

Dialogues in Urban and Regional Planning 6 Christopher Silver 2017-08-24 The Dialogues in Urban and Regional Planning series offers a selection of some of the best scholarship in urban and regional planning from around the world. The internationally recognized authors of these award-winning papers take up a range of salient issues from the theory and practice of planning. This 6th volume incorporates essays that explore the salient issue commonly referred to as "The Right to the City." This theme speaks to a growing new movement within planning theory and practice with multiple aims and strategies but with the common objective of advancing a more just and equitable world. The right to the city functions as a manifesto advancing academic explorations of the opportunities for, and barriers to, expanding human and environmental justice. At the same time, it extends beyond academic inquiry to engage directly with the policy, legal and political dimensions of human rights. The right to the city has been invoked by global bodies such as United Nations-Habitat and the United Nations Educational, Scientific and Cultural Organization to bolster not only their agendas around fundamental human rights but advance urban policies promoting inclusion, sustainability, and resilience. Dialogues 6 offers engaging explorations into the academic expeditions by the global planning community that have helped to energize this movement. The papers assembled here through processes of peer review represent an invaluable collection to untangle the complexities of this dynamic new approach to urban and regional planning. The Dialogues in Urban and Regional Planning (DURP) series is published in association with the Global Planning Education Association Network (GPEAN) and its member

national and transnational planning schools associations.

Building Migrant Cities in the Gulf Florian Wiedmann 2019-07-25 Human history has seen many settlements transformed or built entirely by expatriate work forces and foreigners arriving from various places. Recent migration patterns in the Gulf have led to emerging 'airport societies' on unprecedented scales. Most guest workers, both labourers and mid to high-income groups, perceive their stay as a temporary opportunity to earn suitable income or gain experience. This timely book analyses the essential characteristics of this unique urban phenomenon substantiated by concrete examples and empirical research. Both authors have lived and worked in the Gulf including Qatar, Bahrain and the United Arab Emirates during various periods between 2006 and 2014. They explore Gulf cities from macro and interconnected perspectives rather than focusing solely on singular aspects within the built environment. As academic architects specialised in urbanism and the complex dynamics between people and places the authors build new bridges for understanding demographic and social changes impacting urban transformations in the Gulf.

Transformative Climate Governance Katharina Hölscher 2020-08-26 How to progress climate science to be policy-relevant and actionable? This book presents a novel framework to give a positive vision and structuring approach to guide research and practice on transformative climate governance, to shift the narrative from apathy and stalemate to action and transformation. Our vision contrasts existing climate governance and associated lock-ins that signify the institutional resistance to change. To effectively address climate change, climate governance itself needs to be transformed to foster sustainability transitions under climate change. The book brings together a collection of case studies to investigate how capacities for transformative climate governance are developing at multiple scales and how they can be strengthened vis-à-vis existing governance regimes. Specifically, it sheds light on the following questions: What are key overarching conditions, actors and activities that facilitate governance for transformation under climate change? Given persistent climate governance lock-ins, what needs to happen in research and policy to build-up the capacities that transform climate governance and ensure effective climate action?

Democratic Governance Séverine Bellina 2009 'Governance' has become a key word in the lexicon of international relations over the last twenty years. It is used, loosely, and invariably in a liberal idiom, by scholars, activists, civil society organizations, politicians and the voluntary sector. In many respects it has attained the status of a fetish, yet 'governance' remains a notion that has multiple definitions, a concept in-the-making. Notwithstanding the imprecision with which the term is employed, it has become an inescapable paradigm for the politics of development. The contributors to this book, drawn from among some of the world's best area studies specialists, from North and South, offer a diverse global critique of 'governance' as deployed in several key areas: institutions and state actors; the rule of law, democracy and human rights; decentralization and state power; development and, last but not least, international cooperation and the role of the World Bank, the IMF and NGOs. The geographical spread of the volume ranges from Africa to Latin America, from Asia to the Middle East. Their objectives include: a reassessment of 'governance' in its many manifestations; an attempt to free the term from its often unhelpful linkage to the state, and thereby apply it to other organizations and actors; a re-evaluation of the Western-dominated use of the term politically and an attempt to broaden its application beyond issues such as transparency and the fight against corruption; and a search for innovative applications of the term, driven by a consensus that transcends current economic and political inequalities.

Tall Buildings and the City Kheir Al-Kodmany 2020-07-09 The chaotic proliferation of skyscrapers in many cities around the world is contributing to a decline in placemaking. This book examines the role of skyscrapers and open spaces in promoting placemaking in the city of Chicago. Chicago's skyscrapers tell an epic story of transformative architectural design, innovative engineering solutions, and bold entrepreneurial spirit. The city's public plazas and open spaces attract visitors, breathe life, and bring balance into the cityscape. Using locational data from social media platforms, including Twitter, Facebook, and Instagram, along with imagery from Google

Earth, fieldwork, direct observations, in-depth surveys, and the combined insights from architectural and urban design literature, this study reveals the roles that socio-spatial clusters of skyscrapers, public spaces, architecture, and artwork play to enhance placemaking in Chicago. The study illustrates how Chicago, as the birthplace of skyscrapers, remains a leading city in tall building integration and innovation. Focusing on some of the finest urban places in America, including the Chicago River, the Magnificent Mile, and the Chicago Loop, the book offers meaningful architectural and urban design lessons that are transferable to emerging skyscraper cities around the globe.

Urban Analytics with Social Media Data Tan Yigitcanlar 2022-07-27 The use of data science and urban analytics has become a defining feature of smart cities. This timely book is a clear guide to the use of social media data for urban analytics. The book presents the foundations of urban analytics with social media data, along with real-world applications and insights on the platforms we use today. It looks at social media analytics platforms, cyberphysical data analytics platforms, crowd detection platforms, City-as-a-Platform, and city-as-a-sensor for platform urbanism. The book provides examples to illustrate how we apply and analyse social media data to determine disaster severity, assist authorities with pandemic policy, and capture public perception of smart cities. This will be a useful reference for those involved with and researching social, data, and urban analytics and informatics.

Urban Planning, Management and Governance in Emerging Economies Jan Fransen 2021-06-28 Exploring how urban professionals plan, manage and govern cities in emerging economies, this insightful book studies the actions and instruments they employ. It highlights how the paradigms of interventions and approaches to urban management are shifting, indicating that urban governance is becoming increasingly important in dealing with wicked issues, like climate change and social and economic inequalities in cities. Urban Planning, Management and Governance in Emerging Economies offers rich international examples looking at housing, public space, water, climate change, the environment, and economic development. Chapters showcase the changing role of urban professionals, with a particular focus on the dynamic social, cultural and economic transformations of cities in emerging economies. Exploring contemporary approaches to urban governance, contributors draw attention to the prevalence of smart cities, new forms of partnerships, and just transitions in a changing urban landscape. Researchers and students of urban development, planning, management and governance will appreciate the multiple theoretical angles and the key case studies used throughout the book. The examples and theories will be helpful for urban leaders, strategists and advocates working in emerging economies.

Green and Ecological Technologies for Urban Planning: Creating Smart Cities Ercoskun, Ozge Yalciner 2011-12-31 Ecological and technological (eco-tech) planning provides a possible response to the essential issues of sustainability and rehabilitation in rapidly growing urban spaces. Green and Ecological Technologies for Urban Planning: Creating Smart Cities addresses the ecological, technological, and social challenges faced in the smart urban planning and design of settlements when using eco-technologies – from sustainable land use to transportation, and from green areas to municipal applications – with a focus on resilience. Containing research from leading international experts, this book provides comprehensive coverage and definitions of the most important issues, concepts, trends, and technologies within the planning field.

Governance and Planning of Mega-City Regions Jiang Xu 2010-09-13 Provides a comparative treatment and examination of how new approaches in governance and planning are reshaping mega-city regions around the world. The contributors highlight how European mega-city regions are evolving and strategic intervention redefined to enable the integration of urban qualities in a multi-level governance environment, how traditional federal countries in North America and Australia see the promise of major policies and development initiatives finally moving ahead to herald a more strategic intervention at national and regional scales, and how transitional economies in China witness the rise of state strategies to control the articulation of scales and to

reassert the functional importance of state in a growing diffused power context.

Cities and Sustainability S. Mahendra Dev 2015-05-11 The book addresses the sustainability of cities in the context of sustainability science and its application to the city boundary. In doing so it investigates all the components of a city on the basis of sustainability criteria. To achieve sustainability it is essential to adopt an integrated strategy that reflects all sectors within the city boundary and also address the four key normative concepts: the right to develop for all sections, social inclusion, convergence in living standards and shared responsibility and opportunities among sectors and sections. In this book, the individual chapters examine the nodes of sustainability of a city and thus essentially present a large canvas wherein all sustainability-relevant issues are interwoven. This integrative approach is at the heart of the book and offers an extensive, innovative framework for future research on cities and sustainability alike. The book also includes selected case studies that add to the reading and comprehension value of the concepts presented, ensuring a blend of theory and practical case studies to help readers better comprehend the principle of sustainability and its application.

Urban Infrastructure and Governance G Ramesh 2020-11-30 The book contains a selection of papers on urban governance in its multiple perspectives. It has evolved from the presentations made at the Third International Conference on Public Policy and Management held in 2008. The topics are grouped into several themes: Urban Plan and Governance, Urban Governance through Partnership and Participation, and Financing Urban Infrastructure. With several examples from developing nations, the book dwells into the practical and managerial aspects of urban planning, partnerships, participation, financial mobilization and effective governance. One of the highlights of the book is that it looks at financial mobilization as a strategy for governance and how the financial system in itself can be an instrument of governance.
